

Dear CEO Kimberly Harris,

06/28/2017

Thank you for giving us energy to live in this society. The ~~two~~ 2 boilers that have been turned off, I appreciate it very much. ~~Then~~ In addition there are 2 more boilers that should be turned off, as well.

As a student / Teen the need for a clean environment is necessary for me to breath happy. I can't breath well in smoggy areas, like many others, and it would be nice to live in an environment where I can breath clean air. I also play many sports like, Track, wrestling, and swim. As an athlete I would be breathing heavenly where I need more air. needing clean air would also help.

As a future parent, wanting a green environment for my kids is something they should have. The carbon emissions in the air causes heat to be trapped in our atmosphere making our earth heat up. This is an issue due to ice melting causing sea rise and causes ~~more~~ more harmful weathers. This is not ~~some~~ an environment I want for my kids. Therefore we must take action now and prevent global warming by shutting down the 2 other boilers.

As humans of the world we should deserve the best environment to live in. We should protect our planet

and ~~then~~ use renewable energy. Renewable energy will help us reduce our carbon emissions which is a positive to all. Therefore we really need to stop most carbon emissions and use renewable energy.

Sincerely,

peehunnik keo

SEATTLE, WA.
