

June 28, 17

Dear Kimberly Harris,

My name is Renee Ostrem and I am a Shoreline, WA resident and a PSE Customer. I am very impressed with your efforts to be greener and loved reading through all of the PSE Marketing inserts that I received in my PSE Bill. In fact, I was excited about your rebate program to switch from ^{an} electric to a gas water heater and called your energy consultant hotline. I actually am going to invest in a gas "energy efficient" water heater now due to your great marketing. I am happy to support any company that encourages their customers to reduce their carbon footprint.

I was then disgusted to learn that 30% of PSE's energy comes from coal! I then imagined a plant spewing black smog into the air! So GROSS and hypocritical. I am a rate payer and want PSE to close the last two coal plants in Colstrip by 2025! Why spend all this money on marketing that you are a green company when you still use coal! Shame on you!

Sincerely-

Renee Ostrem
