Ms. Kimberly Harris, CEO
Puget Sound Energy
Bellevue, WA

Dear Ms. Harris

As grandmother of two young boys in Seattle, I thank you for PSE's commitment to discontinue use of two coal plants at Colstrip, MT. Having worked for many years to protect children's health and safety, I urge you to close the other two plants there, to meet the King County 100% renewable energy goal by 2035.

I suggest that, to take your ~~company~~ company into the renewable future, you build inexpensive solar and/or wind farms in the Colstrip area. This will provide good and healthy jobs in that community and make use of your ^{existent} transmission capacity. You will also gain the inexpensive means of providing power into the future, which should appeal to your shareholders and rate payers.

Most sincerely

Deborah Stewart
