

Dear Kimberly Harris,

I am writing to you today to advocate for Puget Sound Energy to ~~shut down~~ retire your remaining 2 units of the Colstrip coal plant.

I am a concerned American citizen concerned about the future of this planet. I want both of us to breath better in the future, and I want our children to be able to live in a comfortable. This can only happen if people like you, people with influence and the ability to make positive change, act as fast as possible. I love my planet, I love the pacific northwest, and I love Washington. It would break my heart if coal was continued to be burned here.

Washington is also a leader in climate change mitigation. I sincerely hope we can look back and see that Puget Sound Energy was a leader in Washington to turn from coal to renewables. ~~Whenever~~ Renewables are the future, clean energy is the future, and I want Puget Sound Energy to look toward the future where coal is eradicated and see themselves as a leader.

I, again, urge you to go green and ~~shut down~~ shut down Colstrip units 3 & 4 and look towards using renewables for our future

Best

Grace Campbell
