Ms. Kimberly Harris CEO  
Puget Sound Energy

Dear Ms. Harris,

I write to you today as a concerned resident of  
Washington (Shoreline - Seattle), and very concerned  
about our space sciences college's education.

In Closing I must add that I have been a PSE customer for 25 years in the house with the address above. My house has a natural gas furnace and gas stove.

The climate crisis is SO important to me that I do not use the gas furnace, having replaced that heat source with an electric-powered heat pump. And in the next month by August 2017 I will have replaced the gas stove with an electric stove. At that time, I will close my PSE account.

Please note that I do not close this account as part of my plea to you and to PSE to change your course of transition. It was always ~~my~~ my plan when I bought the house.

I write today to advocate ATTNUS, gas and for renewable resources for electricity generation.

Thank you very much for your time today —

Simone P.
