

Docket UE-170033

To
Washington Utilities + Trans-
portation:

Rate raise is all well and
good so long as the
investors keep up their
pockets. So there are
good months and bad
months but to raise
rates when most people
didn't get a pay raise
or like me my social
security wasn't even half
of the new rates and
no way to catch up
like big businesses.

PSE is getting too big
and work with what
they have ~~to~~ instead of
asking everyyear and budget
already pre planned.
