Subject: PLEASE PROTECT Washington's Clean Energy Future!
Date: Tuesday, December 3, 2019 1:24:14 AM

Dear Washington UTC,

It is crucial that the UTC hold planning sessions every TWO, NOT FOUR years! Without this timely oversight process, it will be harder than ever to stop new fossil fuel investments from taking place. I am so tired of signing petitions and writing emails in an effort to stop utilities like PSE and Avista from adding new fossil fuel infrastructure in defiance of Washington's new clean energy laws!

This is a comment for Docket # UE 190698, written by a Washington State ratepayer. I support effective public accountability and engagement for investor-owned utilities and VERY MUCH appreciate your role in making sure that the implementation of CETA delivers on its intended vision of a state powered by 100% clean energy.

We must have frequent public participation in energy planning. Integrated Resource Plans have been a powerful tool for public input here in Washington State, and it has allowed customers to advocate for clean, transparent, and equitable energy decisions.

Thank you for making sure that utilities are accountable to the public!

Sincerely,

Julia Glover
