### Event Description

#### Event Date and Time

Start: 12/14/2024 05:00

End: 12/16/2024 08:20

#### Event Type

Wind

#### Service Areas Significantly Affected

Island, Skagit, Whatcom, and Kitsap service areas. The ECC was not activated for this event.

#### Number of Customers Affected

System wide, approximately 120,922 customers were without power during the course of this event.

#### Summary of System Impacts

Total Number of Outages for the Event	567
Transmission Line Segments Affected	9
Impacted Substations	1

**Major Event – Qualification Summary  
IEEE1 Standard 1366**

IEEE Standard 1366 was established to present a set of terms and definitions which can be used to foster uniformity in the development of electric system service reliability indices, to identify factors which affect the indices, and to aid in consistent reporting practices among utilities. Also, it provides guidance for new personnel in the reliability area and tools for internal as well as external comparisons. The Major Event Day definition was created as part of IEEE Standard 1366 to allow for consistent calculation of reliability metrics between utilities and enable more valid comparisons with other utility reliability metrics.

**Event Restoration – YTD Cost Summary**

Starting from the 2018 calendar year, PSE continues its existing Qualifying Storm Loss Deferral Mechanism for any storm restoration costs incurred on or after January 1, 2018, with the following modifications that were agreed to in settlement and the settlement was approved by the Commission in PSE’s 2017 general rate case:

- (i) the cumulative annual cost threshold for deferral of storms under the Qualifying Storm Loss Deferral Mechanism shall be increased from \$8 million to \$10 million,
- (ii) qualifying events that cost less than \$500,000 will not qualify for deferral, and
- (iii) the cumulative annual cost threshold for the Qualifying Storm Loss Deferral Mechanism shall exclude storm events with costs less than \$500,000.

**Media & Communication Coverage****FOX 13 News****Nearly 70K lost power as gusty winds moved across Puget Sound region Saturday**

By Ramsey PfeffingerPublished December 14, 2024 10:13am PSTSeattleFOX 13 Seattle

SEATTLE - A series of weather patterns causing high wind gusts, heavy mountain snowfall, and persistent lowland rain are moving through the Puget Sound region this weekend.

Thousands of people across western Washington remain without power, this according to utility outage maps. The areas impacted include Seattle and surrounding communities.

Communities like Renton's La Rosa Meadows neighborhood was still in the dark Saturday night, despite an estimated restoration time of 3 p.m.

Transportation officials Saturday morning were cautioning drivers to be on the lookout for flying debris, hanging stoplights and downed trees.

Keep reading for what to know about the power outages going on around the region.

"It's pretty bad out here," said Danny Waldreb.

Waldreb lives in Renton. His neighborhood has been without power since 11 a.m. Saturday.

That's when heavy winds toppled a nearby tree. As it fell, it took down power lines. The tension from those wires led to at least one power pole snapping.

"It woke me up," said Waldreb. "I heard the cracking of the pole. It looks like the tree took everything down. I have wires still attached to my house. Cable also got ripped out. Repair is going to need some TLC."

Power outages across Puget Sound region on Dec. 14

As of 10 a.m. Sunday, power outages were still impacting about 4,000 customers, down from a peak of nearly 70,000 midday Saturday. Puget Sound Energy outage map show highest outages around Bainbridge Island, Whidbey Island, and areas west of Vashon Island.

## Utilities restore most power outages that impacted thousands in Western Washington

Crews with multiple utilities — including Puget Sound Energy (PSE) and the Snohomish County Public Utility District (Snohomish PUD) — have restored power to tens of thousands of customers after high winds once again blasted Western Washington.

As of 5 a.m. Monday, just 427 homes and businesses in Washington remained impacted by power outages, the website [poweroutage.us](https://poweroutage.us) confirmed. At 10 a.m. Sunday, 4,355 customers in Washington were affected by power outages. That is down significantly from the first part of the weekend when at 1:45 p.m. on Saturday, 80,676 Washington customers were impacted. There were nearly 95,000 homes and businesses impacted late Saturday morning.

Looking at specific utilities, PSE saw the largest number of customers affected, according to its [outage map](#). At 5 a.m. Monday, the utility reported 43 “active outages” and 279 customers impacted. On Sunday morning, crews had restored power to all but about 4,000 of those customers. At 7:30 p.m. Saturday, there were more than 28,000 homes and businesses were impacted and more than 60,000 affected earlier in the day Saturday.

There were no reported Snohomish PUD outages as of 5 a.m. Monday. There were about 75 homes and businesses impacted as of Sunday at 10 a.m. On Saturday evening, the utility reported about 1,800 customers were without power. Earlier Saturday, more than 15,000 homes and businesses dealt with outages.

Just before 6 p.m. Saturday, a statement on the Snohomish PUD website explained that its “crews will continue working through the night to restore power.” Since the heaviest winds had subsided, the utility anticipated a majority of remaining outages would be restored by midnight.

Previously on Saturday, Snohomish PUD reported it had “20 line and service crews working to restore outages caused by high winds knocking trees and branches into wires.” At that time, utility asked area residents to “assume all downed wires are energized everyone should stay at least 30 feet away.”

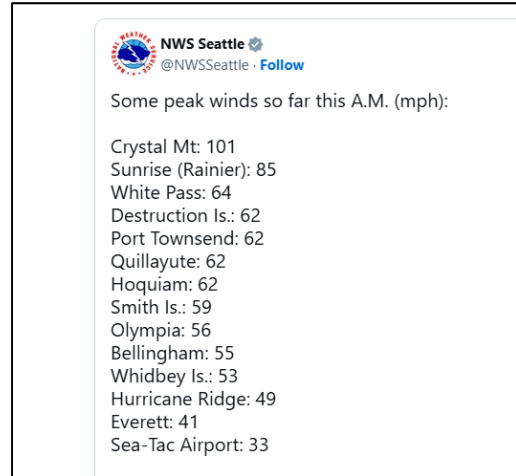

Seattle City Light reported on its outage map that at 1:45 p.m. Saturday, 923 customers were without power and there were 25 “active events.” By 7:30 p.m., 190 customers were without power and there were 9 “active events.” By Sunday morning, City Light crews had restored all but two local outages affecting Seattle neighborhoods. That remained the case as of 5 a.m. Monday morning.

The National Weather Service (NWS) Weather Prediction Center released information indicating the arrival of the cold, windy, wintry mix early Saturday. “A Pacific storm system and accompanying strong flow of moisture/Atmospheric River continues inland over the West (Saturday) morning bringing heavy rainfall,

mountain snow, and gusty winds to central/northern California and the Pacific Northwest,” the Weather Prediction Center statement reads.

As of 7:30 p.m. Saturday, the wind advisory that had been in effect for much of the Puget Sound region had been removed, the NWS Seattle stated. At 2:40 p.m. on Saturday, most of the region — from Bellingham through Seattle and Tacoma down to Olympia — remained in that advisory,

The NWS Seattle reported some high wind speed numbers on X around 7:35 a.m. Saturday. The wind speed hit more than 50 miles per hour (mph) in Olympia, Bellingham and on Whidbey Island, more than 40 mph in Everett and 33 mph at Seattle-Tacoma International Airport (Sea-Tac Airport).

The image is a screenshot of a tweet from the National Weather Service (NWS) Seattle. The tweet header shows the NWS Seattle logo, the name "NWS Seattle", and the handle "@NWSSeattle" with a "Follow" button. The text of the tweet reads: "Some peak winds so far this A.M.
