PC Data Request 58

Re: Depreciation Acceleration.

Please refer to the response to Public Counsel Data Request No. 7. The question asked the Company to provide its "...current best estimate of the date each of the Jim Bridger units will be retired from service." The response does not appear to identify the dates the Company currently projects that each of the Jim Bridger units will be taken out of service. Please provide the Company's current best estimate of the dates in which each of the individual Bridger Units will be retired from service and no longer generating energy.

Response to PC Data Request 58

As provided in the Company's response to Public Counsel Data Request No. 7, the Company's "current best estimate for planning purposes" of the date each of the Jim Bridger units will be retired from service is 2037, which aligns with the currently approved depreciable lives for those resources in the majority of PacifiCorp's states.
