Subject: UE-160918 and UG-160919

I want to state my opposition to the proposed liquid natural gas plant (docket numbers UE-160918 and UG-160919). I feel strongly that we need to be moving to renewable energy sources.

Natural gas is not a clean energy source; it clearly contributes green house gases to our atmosphere. Climate change is impacting our natural environment from decreasing salmon (the sole food source for the southern orca pod), to increasing the pine beetle that is decimating our forests, to raising sea levels with risk of flooding and loss of property, to melting glaciers that risks our water supply.

Let's have a progressive stance on on this issue. Washington can and should join global leaders limiting green house gas emissions and protecting our environment.
