**RE: DO NOT REDOCKET—Docket UE-220359
Response to NWEC regarding the 0.25% annual revenue requirement limit
referenced in RCW 80.28.360**

PacifiCorp dba Pacific Power & Light Company (PacifiCorp) submitted its first Washington Transportation Electrification (TE) Plan, in accordance with RCW 80.28.365, on May 20, 2022. The Company has continued to engage with Commission Staff, customers, stakeholders, and industry partners to further refine its approach to addressing the rapidly evolving transportation electrification sector. That work has resulted in some refinement to the plan as originally submitted and an addendum was filed September 28, 2022.

In response to this addendum update, the NW Energy Coalition (NWEC) requested PacifiCorp to compare its proposed expenditures against the 0.25% annual revenue requirement limit referenced in RCW 80.28.360. RCW 80.28.360 relates to the Commission's ability to establish an incentive rate of return on investments through December 31, 2030, on capital expenditures for electric vehicle supply equipment that is deployed for the benefit of ratepayers.

PacifiCorp proposes a capital budget for the public infrastructure program over the next five years to be around \$500-\$600k. This amount would be well below the 0.25% annual revenue requirement limit referenced in RCW 80.28.360. The current authorized revenue requirement in WA is approximately \$393 million¹ and 0.25% of that equals approximately \$980,000.
