

-- Sent from **Rene Ray** to **Executive Director Mark Johnson** on Nov 10, 2020 --

Dear Mark Johnson,

Thank you for all the work the Utility and Transportation Commission has been doing to bring to fruition the Clean Energy Transformation Act.

I appreciate that the proposed rules set out on how investor-owned utilities must plan, take action, and be held accountable to the 100% clean law. As written, the rules establish Clean Energy Transformation Standards and set up clear processes and requirements for Integrated Resource Plans and Clean Energy Implementation Plans. To finalize the rule, I urge you to:

- o Maintain the Clean Energy Transformation Standards;
- o Ensure that utility actions drive equitable progress by increasing benefits and reducing burdens for vulnerable populations and highly impacted communities, which are predominately communities of color, by getting the key definitions for "equitable distribution" and "indicator" right;
- o Create more accessible opportunities for robust public engagement in Integrated Resource Planning and Clean Energy Implementation Planning that anticipate and break down barriers;
- o Close a loophole in the incremental cost of compliance methodology to ensure consistent compliance across utilities so all Washingtonians benefit; and
- o Explicitly leverage the Commission's enforcement authority to achieve urgent climate progress.

I support Washington's clean energy transformation. I urge you to ensure the rules written now will set our state on the path to an equitable future.

Regards,
Rene Ray

Thank you for all the work the Utility and Transportation Commission has been doing to bring to fruition the Clean Energy Transformation Act.

I appreciate that the proposed rules set out on how investor-owned utilities must plan, take action, and be held accountable to the 100% clean law. As written, the rules establish Clean Energy Transformation Standards and set up clear processes and requirements for Integrated Resource Plans and Clean Energy Implementation Plans. To finalize the rule, I urge you to:

- o Maintain the Clean Energy Transformation Standards;
- o Ensure that utility actions drive equitable progress by increasing benefits and reducing burdens for vulnerable populations and highly impacted communities, which are predominately communities of color, by getting the key definitions for "equitable distribution" and "indicator" right;
- o Create more accessible opportunities for robust public engagement in Integrated Resource Planning and Clean Energy Implementation Planning that anticipate and break down barriers;
- o Close a loophole in the incremental cost of compliance methodology to ensure consistent compliance across utilities so all Washingtonians benefit; and
- o Explicitly leverage the Commission's enforcement authority to achieve urgent climate progress.

I support Washington's clean energy transformation. I urge you to ensure the rules written now will set our state on the path to an equitable future.

Regards,
Janet Alderton

Thank you for all the work the Utility and Transportation Commission has been doing to bring to fruition the Clean Energy Transformation Act.

I appreciate that the proposed rules set out on how investor-owned utilities must plan, take action, and be held accountable to the 100% clean law. As written, the rules establish Clean Energy Transformation Standards and set up clear processes and requirements for Integrated Resource Plans and Clean Energy Implementation Plans. To finalize the rule, I urge you to:

- o Maintain the Clean Energy Transformation Standards;
- o Ensure that utility actions drive equitable progress by increasing benefits and reducing burdens for vulnerable populations and highly impacted communities, which are predominately communities of color, by getting the key definitions for "equitable distribution" and "indicator" right;
- o Create more accessible opportunities for robust public engagement in Integrated Resource Planning and Clean Energy Implementation Planning that anticipate and break down barriers;
- o Close a loophole in the incremental cost of compliance methodology to ensure consistent compliance across utilities so all Washingtonians benefit; and
- o Explicitly leverage the Commission's enforcement authority to achieve urgent climate progress.

I support Washington's clean energy transformation. I urge you to ensure the rules written now will set our state on the path to an equitable future.

Regards,
Pete Compton

Dear Mark Johnson,

I am very concerned about Climate change and excited about the opportunities the Clean Energy Transformation Act present to Washingtonians.

As cars have a high turn over, please do all you can to make driving an electric vehicle convenient in all parts of the state, rural, urban and everything in between. Making progress with transportation electrification is good for our health and for the health of the planet. It can also happen relatively quickly and inexpensively.

We must find ways to fund electrification of the built environment especially the buildings that are already built. These buildings will be with us for a very long time and they need to be upgraded. Please prioritize parts of your plan that address electrification of our existing residential building stock.

These plans must be equitable so that all people can benefit from the comforts of clean electric heating and cooling and the lower utility bills that come with weatherization.

Thank you for all the work the Utility and Transportation Commission has been doing to bring to fruition the Clean Energy Transformation Act.

I appreciate that the proposed rules set out on how investor-owned utilities must plan, take action, and be held accountable to the 100% clean law. Dear Mark Johnson,

Thank you for all the work the Utility and Transportation Commission has been doing to bring to fruition the Clean Energy Transformation Act.

I appreciate that the proposed rules set out on how investor-owned utilities must plan, take action, and be held accountable to the 100% clean law. As written, the rules establish Clean Energy Transformation Standards and set up clear processes and requirements for Integrated Resource Plans and Clean Energy Implementation Plans. To finalize the rule, I urge you to:

- o Maintain the Clean Energy Transformation Standards;
- o Ensure that utility actions drive equitable progress by increasing benefits and reducing burdens for vulnerable populations and highly impacted communities, which are predominately communities of color, by getting the key definitions for "equitable distribution" and "indicator" right;
- o Create more accessible opportunities for robust public engagement in Integrated Resource Planning and Clean Energy Implementation Planning that anticipate and break down barriers;
- o Close a loophole in the incremental cost of compliance methodology to ensure consistent compliance across utilities so all Washingtonians benefit; and
- o Explicitly leverage the Commission's enforcement authority to achieve urgent climate progress.

I support Washington's clean energy transformation. I urge you to ensure the rules written now will set our state on the path to an equitable future.

Dear Mark Johnson,

Thank you for all the work the Utility and Transportation Commission has been doing to bring to fruition the Clean Energy Transformation Act.

I appreciate that the proposed rules set out on how investor-owned utilities must plan, take action, and be held accountable to the 100% clean law. As written, the rules establish Clean Energy Transformation Standards and set up clear processes and requirements for Integrated Resource Plans and Clean Energy Implementation Plans. To finalize the rule, I urge you to:

- o Maintain the Clean Energy Transformation Standards;
- o Ensure that utility actions drive equitable progress by increasing benefits and reducing burdens for vulnerable populations and highly impacted communities, which are predominately communities of color, by getting the key definitions for "equitable distribution" and "indicator" right;
- o Create more accessible opportunities for robust public engagement in Integrated Resource Planning and Clean Energy Implementation Planning that anticipate and break down barriers;
- o Close a loophole in the incremental cost of compliance methodology to ensure consistent compliance across utilities so all Washingtonians benefit; and
- o Explicitly leverage the Commission's enforcement authority to achieve urgent climate progress.

I support Washington's clean energy transformation. I urge you to ensure the rules written now will set our state on the path to an equitable future.

Dear Mark Johnson,

Thank you for all the work the Utility and Transportation Commission has been doing to bring to fruition the Clean Energy Transformation Act.

I appreciate that the proposed rules set out on how investor-owned utilities must plan, take action, and be held accountable to the 100% clean law. As written, the rules establish Clean Energy Transformation Standards and set up clear processes and requirements for Integrated Resource Plans and Clean Energy Implementation Plans. To finalize the rule, I urge you to:

- o Maintain the Clean Energy Transformation Standards;
- o Ensure that utility actions drive equitable progress by increasing benefits and reducing burdens for vulnerable populations and highly impacted communities, which are predominately communities of color, by getting the key definitions for "equitable distribution" and "indicator" right;
- o Create more accessible opportunities for robust public engagement in Integrated Resource Planning and Clean Energy Implementation Planning that anticipate and break down barriers;
- o Close a loophole in the incremental cost of compliance methodology to ensure consistent compliance across utilities so all Washingtonians benefit; and
- o Explicitly leverage the Commission's enforcement authority to achieve urgent climate progress.

I support Washington's clean energy transformation. I urge you to ensure the rules written now will set our state on the path to an equitable future.

Regards,
Louis Vontver

Dear Mark Johnson,

Thank you for all the work the Utility and Transportation Commission has been doing to bring to fruition the Clean Energy Transformation Act.

I appreciate that the proposed rules set out on how investor-owned utilities must plan, take action, and be held accountable to the 100% clean law. As written, the rules establish Clean Energy Transformation Standards and set up clear processes and requirements for Integrated Resource Plans and Clean Energy Implementation Plans. To finalize the rule, I urge you to: Insure that all residents are able to participate in any programs that incentivize residential generation of clean energy, not just home owners. Huge numbers of people live in small foot print apartments or other multi-family dwelling units and they have been shut out of taking advantage of plans that incentivize residential rooftop generation of electricity and that needs to end. After all their tax dollars help fund those very programs. Collective generation "farms" could be established in optimal locations for participants to invest in and reap the benefits from just like I do from my rooftop panels!

- o Maintain the Clean Energy Transformation Standards;
- o Ensure that utility actions drive equitable progress by increasing benefits and reducing burdens for vulnerable populations and highly impacted communities, which are predominately communities of color, by getting the key definitions for "equitable distribution" and "indicator" right;
- o Create more accessible opportunities for robust public engagement in Integrated Resource Planning and Clean Energy Implementation Planning that anticipate and break down barriers;
- o Close a loophole in the incremental cost of compliance methodology to ensure consistent compliance across utilities so all Washingtonians benefit; and
- o Explicitly leverage the Commission's enforcement authority to achieve urgent climate progress.

I support Washington's clean energy transformation. I urge you to ensure the rules written now will set our state on the path to an equitable future.

Dear Mark Johnson,

Thank you for all the work the Utility and Transportation Commission has been doing to bring to fruition the Clean Energy Transformation Act.

I appreciate that the proposed rules set out on how investor-owned utilities must plan, take action, and be held accountable to the 100% clean law. As written, the rules establish Clean Energy Transformation Standards and set up clear processes and requirements for Integrated Resource Plans and Clean Energy Implementation Plans. To finalize the rule, I urge you to:

- o Maintain the Clean Energy Transformation Standards;
- o Ensure that utility actions drive equitable progress by increasing benefits and reducing burdens for vulnerable populations and highly impacted communities, which are predominately communities of color, by getting the key definitions for "equitable distribution" and "indicator" right;
- o Create more accessible opportunities for robust public engagement in Integrated Resource Planning and Clean Energy Implementation Planning that anticipate and break down barriers;
- o Close a loophole in the incremental cost of compliance methodology to ensure consistent compliance across utilities so all Washingtonians benefit; and
- o Explicitly leverage the Commission's enforcement authority to achieve urgent climate progress.

I support Washington's clean energy transformation. I urge you to ensure the rules written now will set our state on the path to an equitable future.

Dear Mark Johnson,

Thank you for all the work the Utility and Transportation Commission has been doing to bring to fruition the Clean Energy Transformation Act.

I appreciate that the proposed rules set out on how investor-owned utilities must plan, take action, and be held accountable to the 100% clean law. As written, the rules establish Clean Energy Transformation Standards and set up clear processes and requirements for Integrated Resource Plans and Clean Energy Implementation Plans. To finalize the rule, I urge you to:

- o Maintain the Clean Energy Transformation Standards;
- o Ensure that utility actions drive equitable progress by increasing benefits and reducing burdens for vulnerable populations and highly impacted communities, which are predominately communities of color, by getting the key definitions for "equitable distribution" and "indicator" right;
- o Create more accessible opportunities for robust public engagement in Integrated Resource Planning and Clean Energy Implementation Planning that anticipate and break down barriers;
- o Close a loophole in the incremental cost of compliance methodology to ensure consistent compliance across utilities so all Washingtonians benefit; and
- o Explicitly leverage the Commission's enforcement authority to achieve urgent climate progress.

I support Washington's clean energy transformation. I urge you to ensure the rules written now will set our state on the path to an equitable future.

Regards,
KATHLEEN MURPHY

Dear Mark Johnson,

Protecting the environment is my top priority and has been for decades. I am writing to urge you to fully support the Clean Energy Transformation Act and see that it is implemented as required.

I urge you to:

- o Maintain the Clean Energy Transformation Standards;
- o Ensure that utility actions drive equitable progress by increasing benefits and reducing burdens for vulnerable populations and highly impacted communities, which are predominately communities of color, by getting the key definitions for "equitable distribution" and "indicator" right;
- o Create more accessible opportunities for robust public engagement in Integrated Resource Planning and Clean Energy Implementation Planning that anticipate and break down barriers;
- o Close a loophole in the incremental cost of compliance methodology to ensure consistent compliance across utilities so all Washingtonians benefit; and
- o Explicitly leverage the Commission's enforcement authority to achieve urgent climate progress.

We need Washington's continued leadership in advancing a clean energy future.

Thank you for the opportunity to comment.

I appreciate that the proposed rules set out on how investor-owned utilities must plan, take action, and be held accountable to the 100% clean law. As written, the rules establish Clean Energy Transformation Standards and set up clear processes and requirements for Integrated Resource Plans and Clean Energy Implementation Plans. To finalize the rule, I urge you to:

- o Maintain the Clean Energy Transformation Standards;
- o Ensure that utility actions drive equitable progress by increasing benefits and reducing burdens for vulnerable populations and highly impacted communities, which are predominately communities of color, by getting the key definitions for "equitable distribution" and "indicator" right;
- o Create more accessible opportunities for robust public engagement in Integrated Resource Planning and Clean Energy Implementation Planning that anticipate and break down barriers;
- o Close a loophole in the incremental cost of compliance methodology to ensure consistent compliance across utilities so all Washingtonians benefit; and
- o Explicitly leverage the Commission's enforcement authority to achieve urgent climate progress.

I support Washington's clean energy transformation. I urge you to ensure the rules written now will set our state on the path to an equitable future.

To finalize the rule, I urge you to:

- o Maintain the Clean Energy Transformation Standards;
- o Ensure that utility actions drive equitable progress by increasing benefits and reducing burdens for vulnerable populations and highly impacted communities, which are predominately communities of color, by getting the key definitions for "equitable distribution" and "indicator" right;
- o Create more accessible opportunities for robust public engagement in Integrated Resource Planning and Clean Energy Implementation Planning that anticipate and break down barriers;
- o Close a loophole in the incremental cost of compliance methodology to ensure consistent compliance across utilities so all Washingtonians benefit; and
- o Explicitly leverage the Commission's enforcement authority to achieve urgent climate progress.

I support Washington's clean energy transformation. I urge you to ensure the rules written now will set our state on the path to an equitable future.

-- Sent from **James Wesley** to **Executive Director Mark Johnson** on Nov 10, 2020 --

Dear Mark Johnson,

Thank you for all the work the Utility and Transportation Commission has been doing to bring to fruition the Clean Energy Transformation Act.

I appreciate that the proposed rules set out on how investor-owned utilities must plan, take action, and be held accountable to the 100% clean law. Upon request I have read the rules you sent me as written establishing Clean Energy Transformation Standards and set up clear processes and requirements for Integrated Resource Plans and Clean Energy Implementation Plans. To finalize the rule, I urge you to:

- o Maintain the Clean Energy Transformation Standards;
- o Ensure that utility actions drive equitable progress by increasing benefits and reducing burdens for vulnerable populations and highly impacted communities, which are predominately communities of color, by getting the key definitions for "equitable distribution" and "indicator" right;
- o Create more accessible opportunities for robust public engagement in Integrated Resource Planning and Clean Energy Implementation Planning that anticipate and break down barriers;
- o Close a loophole in the incremental cost of compliance methodology to ensure consistent compliance across utilities so all Washingtonians benefit; and
- o Explicitly leverage the Commission's enforcement authority to achieve urgent climate progress.

I support Washington's clean energy transformation. I urge you to ensure the rules written now will set our state on the path to an equitable future.

Ultimately I support development of 100% clean energy in Washington, which does NOT include hydroelectric power given the tremendous negative impact on our fisheries.

To finalize the rule, I urge you to:

- o Maintain the Clean Energy Transformation Standards;
- o Ensure that utility actions drive equitable progress by increasing benefits and reducing burdens for vulnerable populations and highly impacted communities, which are predominately communities of color, by getting the key definitions for "equitable distribution" and "indicator" right;
- o Create more accessible opportunities for robust public engagement in Integrated Resource Planning and Clean Energy Implementation Planning that anticipate and break down barriers;
- o Close a loophole in the incremental cost of compliance methodology to ensure consistent compliance across utilities so all Washingtonians benefit; and
- o Explicitly leverage the Commission's enforcement authority to achieve urgent climate progress.

I support Washington's clean energy transformation. I urge you to ensure the rules written now will set our state on the path to an equitable future.

Dear Mark Johnson,

Thank you for all the work the Utility and Transportation Commission has been doing to bring to fruition the Clean Energy Transformation Act.

I appreciate that the proposed rules set out on how investor-owned utilities must plan, take action, and be held accountable to the 100% clean law. As written, the rules establish Clean Energy Transformation Standards and set up clear processes and requirements for Integrated Resource Plans and Clean Energy Implementation Plans. To finalize the rule, I urge you to:

- o Maintain the Clean Energy Transformation Standards;
- o Ensure that utility actions drive equitable progress by increasing benefits and reducing burdens for vulnerable populations and highly impacted communities, which are predominately communities of color, by getting the key definitions for "equitable distribution" and "indicator" right;
- o Create more accessible opportunities for robust public engagement in Integrated Resource Planning and Clean Energy Implementation Planning that anticipate and break down barriers;
- o Close a loophole in the incremental cost of compliance methodology to ensure consistent compliance across utilities so all Washingtonians benefit; and
- o Explicitly leverage the Commission's enforcement authority to achieve urgent climate progress.

I support Washington's clean energy transformation. I urge you to ensure the rules written now will set our state on the path to an equitable future.

- o Ensure that utility actions drive equitable progress by increasing benefits and reducing burdens for vulnerable populations and highly impacted communities, which are predominately communities of color, by getting the key definitions for "equitable distribution" and "indicator" right;
- o Create more accessible opportunities for robust public engagement in Integrated Resource Planning and Clean Energy Implementation Planning that anticipate and break down barriers;
- o Close a loophole in the incremental cost of compliance methodology to ensure consistent compliance across utilities so all Washingtonians benefit; and
- o Explicitly leverage the Commission's enforcement authority to achieve urgent climate progress.

I support Washington's clean energy transformation. I urge you to ensure the rules written now will set our state on the path to an equitable future.

Dear Mark Johnson,

Thank you for all the work the Utility and Transportation Commission has been doing to bring to fruition the Clean Energy Transformation Act.

I appreciate that the proposed rules set out on how investor-owned utilities must plan, take action, and be held accountable to the 100% clean law. As written, the rules establish Clean Energy Transformation Standards and set up clear processes and requirements for Integrated Resource Plans and Clean Energy Implementation Plans. To finalize the rule, I urge you to:

- o Maintain the Clean Energy Transformation Standards;
- o Ensure that utility actions drive equitable progress by increasing benefits and reducing burdens for vulnerable populations and highly impacted communities, which are predominately communities of color, by getting the key definitions for "equitable distribution" and "indicator" right;
- o Create more accessible opportunities for robust public engagement in Integrated Resource Planning and Clean Energy Implementation Planning that anticipate and break down barriers;
- o Close a loophole in the incremental cost of compliance methodology to ensure consistent compliance across utilities so all Washingtonians benefit; and
- o Explicitly leverage the Commission's enforcement authority to achieve urgent climate progress.

I support Washington's clean energy transformation. I urge you to ensure the rules written now will set our state on the path to an equitable future.
