ERRATA TO ORDER 01

RE: *In the Matter of the Petition of Northwest Natural Gas Company,*
Docket UG-210773

TO ALL PARTIES:

On October 14, 2021, the Washington Utilities and Transportation Commission (Commission) entered Order 01, Approving Natural Gas Conservation Potential Assessment Subject to Conditions (Order 01) in the above-referenced docket. It came to the Commission's attention that Order 01 contained an error. Paragraph 2 and Paragraph 32 of the Order erroneously stated the figure for natural gas energy efficiency achievable potential in 2022. The correct figure for Northwest Natural Gas Company's achievable technical potential for 2022 is instead 874,000 therms. Accordingly, paragraph 2 of Order 01 is amended to read as follows:

On July 29, 2021, Northwest Natural Gas Company (NW Natural or Company) filed a 2021 Conservation Potential Assessment (Conservation Potential Assessment or CPA) prepared by Applied Energy Group. In the CPA, the Applied Energy Group provides an analysis of the available and cost-effective conservation potential for NW Natural over a planning horizon from 2022 to 2050. Using both the Total Resource Cost (TRC) test and the Utility Cost Test (UCT), the Applied Energy Group identified 874,000 therms of Achievable Technical Potential in 2022, with additional savings in subsequent years.

For the same reasons, paragraph 32 of Order 01 is amended to read as follows:

- (5) NW Natural identifies 874,000 therms of Achievable Technical Potential in 2022, with additional savings in subsequent years.
