AWEC Data Request 141

Rate Design - Please refer to RMM-12T at 29:8-20. Since PacifiCorp's last rate case, have any Schedule 48T customers shifted all of their load to off-peak times? If so, please identify the number of customers that have taken this action and how long they have only operated during off-peak times.

1st Revised Response to AWEC Data Request 141

Further to the Company's response to AWEC Data Request 141 dated November 20, 2023, the Company became aware that there was a typo in the response. There should be no "." (period) between "No" and "Schedule". Note: all other aspects of the Company's original response are valid and unchanged.

No Schedule 48T customers have shifted all of their load to off-peak times.
