Inland Telephone Company,

Stone Creek Construction is formally creating a written request for dial tone to be brought to our temporary office located at 1650 Pinegrass Loop, Suncadia WA. I would appreciate it if you would answer this request in writing and fax your response by October 21, 2004.

I have already submitted an application with your company and chosen Inland Telephone as my Interlata and Intralata provider, local and long distance provider. I was directed by your office to speak with Suncadia about phone service and that it was their responsibility. I have spoken with Suncadia and they have informed me that it is your responsibility to provide my site with a dial tone. If this is inaccurate please respond in writing and provide me with the exact information that I need to obtain a dial tone to my office.

If you are the responsible party for providing the office with a dial tone I have one more request. I am currently using a phone line located in Cle Elum, WA, and I would like to use that same number for the new dial tone. If this is possible please address the issue in your written response to my other question. Please call if you have any questions about this request.

Sincerely,

M. Jeff Schafer

Dear Mr. Schafer:

In response to your request for service to your temporary office located at 1650 Pinegrass Loop in the Suncadia Resort Development, Inland Telephone Company would be very happy to provide the service you are requesting. Unfortunately, until Inland Telephone Company receives a utility easement from Suncadia, we are unable to get service to you. Suncadia is aware that a Utility Easement Agreement is necessary in order to provide service within the Suncadia Resort Development and a Utility Easement Agreement was presented to them in June of this year. Suncadia has yet to return the signed agreement.

According to WAC 480-120-061 (1)(h), "The applicant is responsible for securing all necessary rights of way or easements on private property, including private roads or driveways as defined in RCW 36.75.010 (10). A private road or driveway is one that has been ascertained by the company not to be public." If you should have any questions, I can be contacted at (509) 649-2211.

Sincerely,

James K. Brooks
Controller

JEFF SCHAFER
