---

Dear Commissioners:

I am very worried about climate change and the future for my grandsons.

I wish that I had an alternative to getting power from Puget Sound Energy since it is so dependent on fossil fuels and so reluctant to change. I hope that you will require PSE to do right by our planet and their customers by replacing all of their coal-burning plants with 100% renewable energy. Their plan to build a new gas plant must be rejected as too costly to ratepayers and the environment.

Sincerely,

Jim Diers (206)408-7051
