NWECC Data Request 03

Net Metering - Please define the terms “net billing” and “net metering”.

Response to NWECC Data Request 03

Net metering is a program structure for customer generators where the energy they export to the grid is subtracted from the energy delivered to them from the grid and the customer generator is billed for the net quantity of energy at standard retail tariff rates.

Net billing is a program structure for customer generators where they are billed for the energy delivered to them from the grid at standard retail tariff rates and are credited financially for the energy they export to the grid at the net billing program rates.

NWECC Data Request 05

Net Metering - Please state the specific seasonal peak and off-peak rates that the Company plans to use in its net energy metering successor program (described in Schedule 138).

Response to NWECC Data Request 05

For residential Schedule 138 customers required to take service on time of use Schedule 19, refer to Exhibit RMM-11r, tariff sheet 19.1.

For small general service Schedule 138 customers required to take service on the Company's proposed Schedule 24 optional time-of-use program, refer to Exhibit RMM-11r, tariff sheets 24.1, 24.2, and 24.3.
