Erin

As discussed. If you wish to complain about the overreach (my opinion) and lack of information and time I would send emails to

commissioners@utc.wa.gov

LisaW4@ATG.WA.GOV (This is Lisa Gafkin, Assistant Attorney General, State of Washinton Seattle Office)

Given the magnitude and vast implications of this legislation, the citizens of the state have the right to fully understand what they have concocted with this agenda. I believe the legislation should be reversed until the people of the State of Washington can adequately have time to understand and respond. The people of the state should also have a clear understanding of the alternative energy sources planned, the expected comparative costs, both on a monthly basis and requirements that may involve reworking and replacing appliances within homes.

The people of the Puget Sound Region should also understand that their utility is not locally owned. Search google, PSE, wikipedia, and look at the history and ownership of the utility. In my opinion this needs to change to local ownership.

If you wish to discuss more, feel free to give me a call, but I do think the more people you can inform about this the better.

Tom

This is heating up. Lots of folks don't know about this and even the state does not understand how to replace the nat gas.

Nor many of the other details. Spoke with Lisa Gafkin assistant AG for the state. Interesting.
