

PACIFIC POWER DATA REQUEST NO. 0011 TO BOISE:

Please refer to Exhibit No. BGM-1T, p. 32. Mr. Mullins states that declining allocation factors should be taken into consideration when evaluating stranded costs. Should allocation factors be considered when evaluating stranded costs for a utility which only serves one state?

RESPONSE TO PACIFIC POWER DATA REQUEST NO. 0011:

To the extent that a utility, which serves only one state, relies on interjurisdictional cost allocation factors, those factors are appropriately considered when evaluating stranded costs.
