Chief Technology & Network Counsel  
MCI WORLDCOM Communications Inc.  
22001 Loudoun County Parkway  
Ashburn, VA 20147

Subject: **CENTRAL OFFICE REPLACEMENT AND UNE SWITCHING AVAILABILITY**

On June 7 and June 15, 2004 Verizon mailed the attached letters (Attachments 1 and 2) to MCI WORLDCOM Communications Inc. providing notification of Office Replacements and UNE Switching Availability for specified locations in Washington and California. Verizon's records indicate that MCI WORLDCOM Communications Inc. obtains Verizon services that are affected by the network changes identified in these notifications. The purpose of this letter is to remind MCI WORLDCOM Communications Inc. of the importance of taking timely action as specified in the Attachments.

The first office to be replaced is Mount Vernon, WA on September 10, 2004. Local Service Requests (LSRs) necessary to support this replacement must be submitted for completion prior to August 27, 2004. Access Service Requests (ASRs) for trunk interconnection at Mount Vernon as well as LSRs and ASRs for the California locations become due during the weeks immediately thereafter. (See Attachments for specifics.) In short, it is important at this time for MCI WORLDCOM Communications Inc. to turn its attention to this matter (if it is not already doing so).

Thank you in advance for your cooperation and attention to this matter. Please contact your Verizon Account Manager if you have any questions.

Sincerely,

A handwritten signature in cursive script that reads "Jeffrey A. Masoner".

Jeffrey A. Masoner  
Vice President – Interconnection Services Policy & Planning

Subject: **MOUNT VERNON, WA CENTRAL OFFICE REPLACEMENT AND UNE SWITCHING AVAILABILITY**

This letter is a **formal** notice under the interconnection agreement between «Legal\_Entity» and «CLEC» for the «State» to inform you of a Verizon end office replacement project in the state of Washington. Verizon will replace the existing Mount Vernon central office Nortel DMS-100 switch with a Nortel Succession packet switch. This will require your company to perform certain work as described below.

### Network Changes

The project will replace the existing Mount Vernon class 5 Nortel DMS-100 switch with a Nortel Succession packet switch, moving the class 5 central office to another building. At the completion of the project, the existing switch will only serve a class 4 toll switching function. Verizon will use a trunk gateway to interface with the packet switch so that the existing means of interconnection will be unchanged.

This letter should provide you all of the information necessary to build direct end office trunks to the new class 5 packet switch trunk gateway. The following details will allow you to submit ASR's in a timely and accurate manner:

### General Information

Existing Central Office - Mount Vernon, Washington: MTRWAXXDS1  
New Central Office - Mount Vernon, Washington: MTRWAXFPSA  
New Central Office Point Code - Mount Vernon, Washington: 240049038  
Timeframe for ASR's to be submitted for new CLLI code: 9/13/04 through 10/15/04  
Due dates for trunks to be established on new CLLI code: 9/24/04 through 10/29/04

«Contract\_Number»

### Trunk Rearrangements

ASR's to disconnect and reestablish service between the old and new Mount Vernon, Washington Central Office entities should be related via the RPON (Related Purchase Order Number) field on the ASR (i.e., trunk order to trunk order and facility order to facility order). Note, Verizon will provision inter-machine trunks during the transition to ensure service continuity is maintained from the existing switch to the new switch, and carriers can initiate trunk orders on the new switch going forward consistent with generally followed procedures.

ASR's should carry a project id of "MTVRWAXF-TRUNKS" in the ASR "PROJECT" field.

Please consider this letter as a substitute for individual Trunk Group Service Requests (TGSR's) that will not be submitted separately.

### SS7 Impacts

If SS7 service arrangements are provided to your company via another telecommunications provider, you must contact that provider and make arrangements for their code administrator to update the Local Exchange Routing Guide (LERG). This is a critical step to follow to ensure that your traffic will not be misrouted nor interrupted. Verizon will not make these arrangements on your company's behalf.

### Unbundled Switching

In its Report and Order and Order on Remand and Further Notice of Proposed Rulemaking, CC Docket Nos. 01-338, 96-98, and 98-147, FCC 03-36, 18 FCC Rcd 16978, released on August 21, 2003 (the "Triennial Review Order"), the Federal Communications Commission promulgated rules and regulations pertaining to the availability of unbundled network elements pursuant to Section 251(c)(3) of the Communications Act of 1934 (the "Act"). Those rules and regulations, together with the other relevant provisions of the Triennial Review Order, took effect on October 2, 2003.

Under the rules adopted in the Triennial Review Order, as under prior FCC rules, Verizon is not required to provide unbundled packet switching. Verizon also is not required to provide unbundled shared transport for use with unbundled packet switching. The FCC's rules and regulations pertaining to unbundled packet switching, and the related provisions of the Triennial Review Order, were affirmed by the U.S. Court of Appeals for the D.C. Circuit on March 2, 2004.

Accordingly, Verizon is hereby providing formal notice that Verizon will not provide unbundled packet switching at the site identified above in accordance with the provisions of the Triennial Review Order beginning September 10, 2004. The unavailability of unbundled switching at the Mount Vernon Central Office will also affect the remotes identified on Attachment 1 to this letter to the extent they rely on access to unbundled switching at the host.

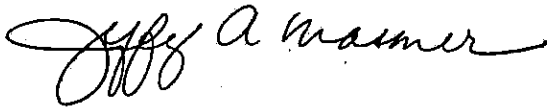

If you have unbundled local circuit switching arrangements at Mount Vernon, Washington or the other impacted sites identified in Attachment 1, you must submit LSRs to establish alternative service arrangements, such as one of the many resale arrangements, for completion no later than August 27, 2004. If you prefer not to convert to an alternate arrangement, you may terminate any unbundled local circuit switching arrangements through existing disconnect

processes. Any remaining unbundled local circuit switching arrangements in-service at the time of the switch conversion will be converted to resold voice service.

Note, this will affect any UNE-P dependent line splitting arrangements from the above mentioned locations as well; therefore, customers will need to submit LSR orders requesting an alternative service such as a UNE-loop to provision DSL service for completion no later than August 27, 2004.

Any questions regarding this correspondence should be directed to your Account Manager.

Sincerely,

Jeffrey A. Masoner

Vice President – Interconnection Services Policy & Planning

Subject: California Central Office Replacement and UNE Switching Availability

This letter is a **formal notice** under the interconnection agreement between «Legal\_Entity» and «CLEC» for the «State» to inform you of a Verizon end office replacement project in the state of California for the following central offices:

Redhawk, CA:	TMCLCAXHDS0
Elsinore Grand, CA:	ELSNCAAXG67K
Homeland, CA:	HMLDCAXF92H
Baldwin Park, CA:	BLPKCAXF33K
Azusa, CA:	AZUSCAXF33K

This will require your company to perform certain work as described below.

Network Changes

The project will replace the existing RedHawk Class 5 Nortel DMS-100 central office switch, with a Nortel Succession packet switch, which will serve as a Host switch for Elsinore and Homeland, both of which also will be replaced with a Nortel Succession packet switch. Additionally, the project will replace the existing Baldwin Park Class 5 Nortel DMS-100 central office switch with a Nortel Succession packet switch, which will serve as a Host switch for the Azusa central office, which also will be replaced with a Nortel Succession packet switch. This will require that existing facilities to the Elsinore, Homeland and Azusa central offices be rehomed or disconnected. Verizon will use a trunk gateway to interface with the packet switches so that the existing means of interconnection will be unchanged.

This letter is intended to provide you all of the information necessary to build trunks directly to the new switches. The following details will allow you to submit ASR's in a timely and accurate manner:

«Contract\_Number»

# California Central Office Replacement and UNE Switching Availability

June 15, 2004

Page 2

## General Information

New Central Offices, Associated CLLI codes and SS7 Point Codes:

Redhawk, CA (Host):	TMCLCAXHPSA; 240015024
Elsinore Grand, CA (Remote):	TMCLCAXHPSA; 240015024
Homeland, CA (Remote):	TMCLCAXHPSA; 240015024
Baldwin Park, CA (Host):	BLPKCAXFPSA; 240015042
Azusa, CA (Remote):	BLPKCAXFPSA; 240015042

The dates by which ASR's must be submitted for new CLLI code (i.e., orders to be received no later than) are:

Redhawk, CA (Host):	8/3/2004
Elsinore Grand, CA (Remote):	8/31/2004
Homeland, CA (Remote):	9/28/2004
Baldwin Park, CA (Host):	8/17/2004
Azusa, CA (Remote):	9/14/2004

Due dates for trunks to be established on new CLLI code:

Redhawk, CA (Host):	9/17/2004
Elsinore Grand, CA (Remote):	10/15/2004
Homeland, CA (Remote):	11/12/2004
Baldwin Park, CA (Host):	10/1/2004
Azusa, CA (Remote):	10/29/2004

## Trunk Rearrangements

ASR's to disconnect and reestablish service between the old and new California Class 5 Central Office entities listed above should be related via the RPON (Related Purchase Order Number) field on the ASR (i.e., trunk order to trunk order and facility order to facility order).

ASR's should carry the following project identifiers in the ASR "PROJECT" field:

Redhawk, CA (Host):	SLoA/Redhawk
Elsinore Grand, CA (Remote):	SLoA/Elsinore
Homeland, CA (Remote):	SLoA/Homeland
Baldwin Park, CA (Host):	SLoA/Baldwin
Azusa, CA (Remote):	SLoA/Azusa

Please consider this letter as a substitute for individual Trunk Group Service Requests (TGSR's) that will not be submitted separately.

## SS7 Impacts

If SS7 service arrangements are provided to your company via another telecommunications provider, you must contact that provider and make arrangements for their code administrator to update the Local Exchange Routing Guide (LERG). This is a critical step to follow to ensure that your traffic will not be misrouted nor interrupted. Verizon will not make these arrangements on your company's behalf.

## California Central Office Replacement and UNE Switching Availability

June 15, 2004

Page 3

### Unbundled Switching

In its Report and Order and Order on Remand and Further Notice of Proposed Rulemaking, CC Docket Nos. 01-338, 96-98, and 98-147, FCC 03-36, 18 FCC Rcd 16978, released on August 21, 2003 (the "Triennial Review Order"), the Federal Communications Commission promulgated rules and regulations pertaining to the availability of unbundled network elements pursuant to Section 251(c)(3) of the Communications Act of 1934 (the "Act"). Those rules and regulations, together with the other relevant provisions of the Triennial Review Order, took effect on October 2, 2003.

Under the rules adopted in the Triennial Review Order, as under prior FCC rules, Verizon is not required to provide unbundled packet switching. Verizon also is not required to provide unbundled shared transport for use with unbundled packet switching. The FCC's rules and regulations pertaining to unbundled packet switching, and the related provisions of the Triennial Review Order, were affirmed by the U.S. Court of Appeals for the D.C. Circuit on March 2, 2004.

Accordingly, Verizon is hereby providing formal notice that Verizon will not provide unbundled packet switching at the sites identified above in accordance with the provisions of the Triennial Review Order beginning:

Redhawk, CA (Host):	9/17/2004
Elsinore Grand, CA (Remote):	10/15/2004
Homeland, CA (Remote):	11/12/2004
Baldwin Park, CA (Host):	10/1/2004
Azusa, CA (Remote):	10/29/2004

Unbundled switching also will not be available on the lines in the remote offices that are served by the newly deployed packet switches according to the following schedule:

Redhawk, CA (Host):	9/17/2004
Elsinore Grand, CA (Remote):	10/15/2004
Homeland, CA (Remote):	11/12/2004
Baldwin Park, CA (Host):	10/1/2004
Azusa, CA (Remote):	10/29/2004

Attachment 1 to this letter identifies the impacted remotes by packet switch.

If you have unbundled local circuit switching arrangements at these California central office locations or the other impacted sites identified in Attachment 1, you must submit LSRs to establish alternative service, such as one of the many available resale arrangements offered commercially by Verizon, for completion no later than:

Redhawk, CA:	September 3, 2004
Elsinore Grand, CA:	October 1, 2004
Homeland, CA:	October 29, 2004
Baldwin Park, CA:	September 17, 2004
Azusa, CA:	October 15, 2004

If you take no action before the time of the switch conversion, your current unbundled switch arrangements will be converted to resold voice service. Of course, if you prefer not to convert to an alternate arrangement, you may terminate any unbundled local circuit switching arrangements through existing disconnect processes for completion no later than:
