**NOTES:**

Unless otherwise indicated, all rates are pursuant to Washington Utilities and Transportation Commission Dockets:

- A: Generic Cost Docket, UT-960369
- B: Docket UT-003013, Part A
- C: Docket UT-003013, Part B
- D: Docket UT-003013, Part C
- E: Docket UT-003013, Part D
- F: Docket UT-023003

# Denotes voluntary rate reduction. These rates are not subject to true up and will be applied on a going forward basis. Deaveraged loop and subloop (distribution and feeder) rates are pursuant 37th supplemental order in Docket UT-003013.

## Additional reduction to the voluntary reductions reflected in the September 26, 2002 exhibit.

### Rate voluntarily deaveraged to be consistent with the deaveraged loop rate. Deaveraging approach subject to review in the next phase of the cost docket.

- [1] Rate not addressed in a cost proceeding (Estimated TELRIC)
- [2] Market based rates not addressed in the Cost Docket.
- [3] Individual Case Basis
- [4] Rate per FCC guidelines.
- [5] Qwest has agreed to a bill and keep arrangement for EICT, pursuant to 271 workshops.
- [6] When intrastate tariffed DS3 Private Line Transport (PLTS), Local Interconnection Service (LIS) or EEL share the same PLTS multiplexed DS3, the fraction of DSO's dedicated to LIS, EEL, or intrastate PLTS is divided by 672 and multiplied by the applicable products' DS3 rate elements. The Qwest mechanized implementation team will notify the Qwest Service Delivery LIS process manager of this customer-specific requirement.
- [7] All technically feasible Vertical Switch Features are available with compatible unbundled switch ports. No monthly recurring charge applies for Basic Vertical Switch Features. Only Basic Vertical Features with nonrecurring charges are listed. Nonrecurring charges are applicable whenever a feature is added - whether on new installation, conversion or change order activity. Vertical features are included in the switch port and have a rate of zero for recurring.
- [8] Rate has been ordered in a different section and is being used due to the similar characteristics of the element. This rate will be replaced when a rate is developed or ordered for this product.
- [9] Qwest will utilize the Commission TELRIC ordered rates for this element. However, Qwest reserves its right to implement market based prices sometime in the future pursuant to CC Docket No. 96-98, paragraphs 278-287.
- [10] Rate is a blended rate of Local Forecasted Capacity (9.8.2.3 \$0.00066) & Access Forecasted Capacity (9.8.3.2 \$0.00217)
- [11] Must Designate Usage Percentage of Local and Access Traffic
- [12] SRP- Special Request Process is a request by the customer to perform something that is technically feasible but the process and pricing are not yet in place.
- [13] The preliminary engineering and planning costs are included in the virtual, caged and cageless space construction charges. These engineering and planning charges are also included in the virtual, caged and cageless quote preparation fees. Upon completion of the collocation construction, the quote preparation fee (QPF) will be credited to the final space construction charge for the collocation job.
- [14] Loop Conditioning charges (Cable Unloading/Bridge Tap Removal) will not apply through 7/31/04 per Advice 3465T.
- [15] Effective 8/1/03 Qwest will no longer charge for Channel Regeneration for both recurring and nonrecurring charges. Contract amendments to remove the charge is not required. Qwest reserves the right to revert back to the contractual rate only after appropriate notice is given. Future regulatory ruling and/or events may be subject to the conditions described under "Change in Law Provisions" of the SGAT (Section 2.2) or the applicable interconnection agreement.
- [16] Initially, Qwest will bill the grandfathered recurring rates for new Shared Loops. Qwest will begin billing the post TRO prices only after CLECs have been provided a forty-five (45) day notice. Rates will be applied prospectively.
- [17] Post TRO Shared Loop Rates were developed using the 2-Wire Nonloaded Loop rate, Zone 1 (\$6.05) as the basis rate. 10/2/03 - 10/1/04 was developed using 25% of basis rate; 10/2/04 - 10/1/05 was developed using 50% of basis rate; 10/2/05 - 10/1/06 was developed using 75% of basis rate. New Shared Loop Arrangements will no longer be available as of 10/2/04. No later than 10/2/06, CLEC must convert all Shared Loop arrangements to a Line Splitting arrangement, to a stand-alone Unbundled Loop, or such other arrangement as CLEC may have negotiated with Qwest to replace such Shared Loop arrangement.
