The purpose of this filing and the contemporaneous natural gas filing is to provide for continuation and expansion of PSE's cost-effective, reliable and feasible natural gas and electric conservation programs. These programs and schedules are set to expire on December 31, 2009. This filing is necessary for the Company to continue acquisition of conservation resources and delivery of conservation services to its customers and to provide for certain changes and enhancements to program offerings.

The Company and the Conservation Resource Advisory Group (CRAG) have met regularly to share and discuss plans for energy efficiency programs, budgets and goals for 2010 through 2011. In developing these programs, the Company and the CRAG considered the energy efficiency resource potential identified in the Company's 2009 Integrated Resource Plan, as well as individual program cost effectiveness and market conditions. This collaborative process resulted in establishing a portfolio of cost-effective, reliable and feasible electric and natural gas conservation programs for 2010-2011. The electric programs are consistent with the biennial conservation target range that the company will file before January 31, 2009, in compliance with WAC 480-109.

A broad array of initiatives serving residential and business customers are presented in this filing, including a new community energy management program (Schedule 241) to help expand conservation from individual to community levels. Several pilot programs will be explored during this biennium, including HVAC initiatives, conservation behavior modification, home intelligence and automation, residential grants and new CFL fixtures. It is projected that many of these pilot programs will be cost-effective. As with all pilot programs, cost-effectiveness evaluations will be performed at various stages throughout. The Company is pursuing the Fuel Conversion program and continuing Commercial/Industrial efforts, including extending the Large Power/Distribution Customer eligibility.

There are also revisions to the attached Schedules which clarify terminology, update regulatory, State code or industry references, add definitions of terms and ensure that effective dates and termination dates reflect the upcoming biennium.

In accordance with the Settlement Stipulation adopted by the Commission in Docket Nos. UE-011570, UG-011571 and UE-011600, CRAG members were provided a complete set of this tariff filing two months (60) days prior to the proposed effective date of this tariff filing; this has allowed the Company to interact with the CRAG with comments and questions.

This filing proposes that the date that electricity conservation programs expire be extended from December 31, 2009, to December 31, 2011.

The Company will submit Appendix A: Program Descriptions; Appendix B: Savings Goals and Budgets; Appendix C: Program Cost Effectiveness and Appendix D: Program Measurement and Evaluation Plan, and Attachment 1 to Appendix A, the Energy Efficiency Services List of Measures, Incentives and Eligibility, under separate cover.

It should be noted that electric service rates are not affected by this filing, since the filing does not include any requested change in the Electricity Conservation Service Rider. That filing will be made on approximately March 1, 2010.

The tariff sheets described herein reflect an issue date of November 30, 2009, and an effective date of January 1, 2010. Posting of proposed tariff changes, as required by WAC 480-100-193, is being made by posting the proposed tariff sheets on the PSE web site immediately prior to or coincident with the date of this transmittal letter in accordance with WAC 480-100-193(1).

This tariff change does not increase recurring charges or restrict access to services. Therefore, notice of proposed tariff change, as required by law and the Commission's rules and regulations (including WAC 480-100-195(3)), is being given to the public immediately prior to, or coincident with, the date of this transmittal letter through web, telephone and mail access in accordance with WAC 480-100-193.

Please contact Lynn Logen at (425) 462-3872 for general information about this filing or contact Andy Hemstreet at (425) 456-2633 for additional information about the programs included in this filing. Please contact Calvin E. Shirley at (425) 456-2426 for policy related questions about this filing. If you have any other questions please contact me at (425) 462-3495.

Very truly yours,
