COMMENTS:

We are requesting a refund of \$275.00 for our Common Carrier Permit Application.

We also are cancelling our application for this pending permit.

The attached inspection and subsequent violation stated that our company needed a Common Carrier Permit. However, after further investigation of the requirements of the CC permit it has come to light that the violation was cited in error, as we do not need a CC permit to operate.

Moore Underground, Inc. is an excavation company located in Oregon who is a private carrier that was hauling its own spoils from a job site in Washington. It is our understanding that a Common Carrier Permit is not needed for this type of work.

Please consider the refund as we were just trying to satisfy the violation notice and had we known that the violation was an error we would not have applied for the CC permit.

Thank you,
 Kendall Miller
