RE: Temporary supplement to Time Schedule No 35, Certificate No. 34

Dear Mr. Danner,

The company requests Commission approval to operate the attached supplement to Time Schedule 35, for Certificate No. 34 on Less Than Statutory Notice, with an effective date of May 1, 2011.

We are being forced by low lake levels on Lake Chelan to request a temporary supplement to our Time Schedule No 35. We received notice on the afternoon of 4/21/11, by email from Scott Buehn of the Chelan County PUD, of their intention to continue to drop the lake level much further than their earlier communication. He stated in an email on 3/28/11 that "mid April's elevation would be near 1083.5 – which will be the lowest elevation before refill occurs".

To clarify our request:

1. We must run the smaller vessel the Lady Express to service Table No. 1 – Lady of the Lake II. The lower rates, to include commuter rates of the Lady of the Lake II will be charged.
2. We must suspend Table No 3 – Lady Express, until there is enough water to operate the Lady of the Lake II. We expect this to be at lake level 1084.0.
3. Chelan County PUD regulates the lake level and has stated they will continue to draw it down and the lake will only rise back up when inflows exceed their outflows. Therefore, we are not able to indicate when this temporary supplement will end.

We have communicated with David Gomez of the WUTC about this. Thank you for your assistance.

Sincerely,

Jack D. Raines

Jack D. Raines
