Mr. Gentry,

Thank you for following up. I am copying your request to withdraw your solid waste application to our licensing department.

Yes, I will need you to notify me when you're registered with the Dept. of Ecology. I also copied Isaac Standen, who can assist you with your registration. His telephone number is (425) 649-7104. Once I receive notification that your company has registered, I will close the investigation. Let me know if you have any questions.

Thank you.

Hi Matt,

I would like to withdraw my solid waste application since it appears it is not necessary for the hauling we will be doing for Drywall Recyclers. We will register with Ecology as a transporter if that is what we need to do. Do you need me to send you confirmation when that is complete or does Ecology do that?

Thanks,
Ron

Mr. Gentry,

If your company registers with the Dept. of Ecology as a Transporter and notify me that you would like to withdraw your solid waste application, I can close the investigation into Everett Fuel & Lumber. Of course, you will not be authorized to haul solid waste, only recyclable materials under your common carrier permit. In addition, you will be required to follow any flow control ordinances in the area you plan to haul.

Please let me know what you intend to do so we can get this taken care of.
