

Cost of Service Generic Proceeding – Natural Gas Service
Meeting Agenda
April 20, 2018

Summary of Previous Meeting:

In February 2017, Stakeholders met to kick off a Generic Proceeding on Cost of Service issues in Washington. This meeting included both Electric and Natural Gas service stakeholders. The meeting started with a discussion of the purpose of the Generic Proceedings and what has led to the present situation. In identifying the scope of issues to be discussed, it was generally agreed that rate design should not be addressed in these meetings but additional information was needed to go beyond that. There was also discussion of the outcome of these proceedings. A majority of participants seemed to prefer a policy statement and were concerned that any resulting document may be too prescriptive without taking into account the unique situations of each company.

I. Introductions

II. Docket Information

Several parties have asked for a specific docket number (UG-170003) for these proceedings. Staff has an internal investigation docket that has been made public. Agendas, meeting notes, and the documents provided today will be posted to it.

III. Information Previously Requested

- a. History of Natural Gas Cost of Service in Washington
- b. Comparison of current Cost of Service Methodologies by Company – *On hold*
- c. Questions and Topics to be addressed by the Generic Proceedings

IV. Recommended Procedural Outcome

V. Scheduling for the future
