

AVISTA CORPORATION  
dba Avista Utilities

SCHEDULE 51 - continued

- 6) "Share of Previous Extension" applies only to Primary Circuits less than five years old. If part of a previous line extension is used to serve a new Customer, the new Customer must pay a share of the previous Primary Circuit cost and Transformer cost, if shared, to the Company before the start of construction. The amount paid by the new Customer will be refunded to existing Customers in relation to their share of the Primary Circuit and Transformer, if shared. The Company will refund appropriate shares to the bearers of Extension Certificates when the Certificates are presented for payment and the connection of the subsequent Customer has been verified. The Company will make a reasonable attempt to inform the bearer of the Certificate when a refund is due. Bearers of Extension Certificates must apply for refunds before the original line extension becomes six years old. Unclaimed refunds will be returned to the contributor.

EXAMPLE:

1. First Customer pays \$10,450 for 1,000 feet of primary underground circuit (\$10.45 per foot).
2. Second Customer takes service within five years using 600 feet of the original extension.
3. Both Customers share the first 600 feet equally:  $600 \text{ ft} \times \$10.45/\text{ft} \times \frac{1}{2} = \$3,135$ .
4. The Second Customer's payment of \$3,135 will be refunded to the First Customer to reduce his investment in the 600 feet to \$3,135. The First Customer's investment in the remaining 400 feet remains at \$4,180 ( $\$10,450 - \$3,135 - \$3,135 = \$4,180$ ).

EXCEPTION: If the refund to the existing Customer is less than \$100 each, the new Customer will not be required to pay that share and the existing Customer will not receive a refund.

4. RULES AND CHARGES FOR UNDEVELOPED RESIDENTIAL LOTS

- a. A development is a group of neighboring undeveloped lots separated by no more than streets and under the ownership or legal control of a single party as determined by the Company. Both the General Rules and the following rules apply to line extensions within residential developments.
- b. Before Company facilities will be installed, the developer must submit a written application for service and a copy of the plat as approved by the governing agency depicting dedicated utility easements approved by the serving utilities and must pay an extension cost to the Company which is computed as follows:

SCHEDULE 51 - continued

	Basic Cost
+	Customer-Requested Costs
+	Exceptional Costs
-	Cost Reductions
+	Customer-Requested Costs
-	(one) Design Fee of \$150 (if paid)
=	extension cost within development
+	cost of extension to development
+	Share of Previous Extension
<hr/>	
=	extension cost

1) "Basic Cost" will be computed from the following rate per lot when the Development serves single phase loads, has at least six lots and the average frontage is no more than 175 feet per lot. The Basic Cost includes the cost of the primary circuit, the transformer and the secondary circuit in the utility easement or public right-of-way, but does not include the service circuit from the point of connection with the secondary circuit to the Point of Delivery.

Developments: \$1,272 per Lot

(R)

The Basic Cost for all other Developments will be computed from the rates listed in this Schedule for Service Circuits, Secondary Circuits, Transformers and Primary Circuits.

2) "Cost Reductions," "Exceptional Costs", "Customer-Requested Costs, and "Share of Previous Extension" are described under Rules for Individual Customers.

3) "Extension to development" is the line extension between the Company's existing energized electric facilities and the boundary of the development. The Rules for Individual Customers apply to the extension to the development.

c. In lieu of a cash payment of the Basic Cost in a Development, the Company will accept a letter of credit, a contractor's performance bond, or another credit instrument agreeable to the Company for \$1,272 per lot upon execution of a written agreement with the Developer. The agreement shall prescribe the requirements for such a credit instrument and shall permit the face amount of the instrument to be reduced annually as new customers are connected within the Development. The developer will provide ditching within the Development.

(R)

d. Prior to the installation of the Service Circuit to each single-family residence in a development, the home builder will be required to make a non-refundable cash payment to the Company of \$19 per residence. There will be no charge to the builder for the installation of the Service Circuit to serve a duplex or multiplex dwelling.

SCHEDULE 51 – continued

- e. A Developer who pays the extension cost described in 4.b.1) may apply for a refund annually for each permanent Customer connected within the Development during the first five years after the extension is completed. The Company will make a reasonable attempt to inform the bearer of the certificate when a refund is due. The Company will pay the refund to the bearer of the Extension Certificate when it is presented to the Company for payment and the connection of the permanent Customer has been verified.

For Developers who have made a cash payment to the Company for the Basic Cost in the development, the sum of all refunds shall not exceed the total Basic Cost paid by the Developer or \$1,272 per lot multiplied by the number lots, whichever is less. The developer must apply for the refunds before the line extension becomes six years old.

(R)

- f. In a Development where primary taps may be required into some lots to provide adequate service or where the loads are not clearly defined, the Company may elect to install only an initial Primary Circuit through the Development (no Transformers or Secondary Circuits). The Rules for Individual Customers will be used to establish the extension cost of the Primary Circuit and that cost must be paid in advance by the Developer.

The permanent Customer on each lot must meet the Rules for Individual Customers for the extension into the lot, except they will not pay a share of the cost of the Primary Circuit through the Development or a share of previous extensions outside the Development. The applicable Allowance will be credited first to the Basic Cost to serve the permanent Customer. The Developer will be refunded only the portion of the Allowance not granted or applied to the permanent Customer.

5. RULES FOR COMMERCIAL AND INDUSTRIAL CUSTOMERS

- a. Both the General Rules and the following rules apply to Line Extensions to serve individual Commercial and Industrial customers.
- b. Single-Phase Extensions: For Customers who may be served at single phase, as determined by the Company, before the start of construction, the Customer must submit a written application for service and pay an extension cost to the Company which is computed as follows:

	Basic Cost
+	Exceptional Costs
-	Allowance
+	Customer-Requested Costs
-	Cost Reductions
-	(one) Design Fee of \$150 (if paid)
+	Share of Previous Extension
=	extension cost

SCHEDULE 51 - continued

7. DEFINITIONS AND CHARGES (listed alphabetically)

- a. "Customer" is any individual, partnership, corporation, association, governmental agency, political subdivision, municipality or other entity.
- b. "Dedicated Utility Easements" are designated strips or locations within the platted development which have been approved by the serving utility companies and the local government planning department and are dedicated to the serving utility companies for the purpose of construction, reconstruction, maintenance and operation of utilities, including the inspection of those utilities at reasonable times and the trimming or removal of brush and trees that may interfere with the construction, maintenance or operation of those utilities.
- c. "Design Fee" is a \$150.00 payment to the Company by the Customer requesting a Line Extension, Conversion, or Relocation, in advance of the Company preparing the design. An initial Design Fee will be collected for any Line Extension, Conversion of Primary Circuit, or Relocation of Primary Circuit that is unusually large, complex, or of a questionable nature. Design Fees will be collected for additional designs if the Customer requests more than one design.
- d. "Extension Certificate" is a transferable certificate which entitles the bearer to receive certain refunds. Certificates will be issued to all Customers paying for a Primary Circuit, including Developers. The conditions under which refunds will be paid are described in this Schedule and on the Certificate.
- e. "Point of Delivery" is the location on the Customer's premises where the Company's Service conductors and the Customer's service entrance conductors are connected at a common point to permit a single meter installation. The Point of Delivery will be designated by the Company.
- f. "Primary Circuit" is the electrical facility between the Company's existing energized primary facilities and the proposed Transformer. The Primary Circuit is single phase operated at 2,400 to 20,000 volts to ground and may include conductors, connectors, supporting structures, conduit and trench. The Basic Cost of the Primary Circuit shall be computed using the following rates.

Single-Phase

Overhead Primary Circuit:

Fixed Costs:	\$4,207 per Customer	(1)
Variable Costs:	\$8.18 per foot	(1)

Underground Primary Circuit:

Fixed Costs:	\$1,813 per Customer	(1)
Variable Costs:	\$10.45 per foot	(1)

Issued March 1, 2017

Effective May 1, 2017

SCHEDULE 51 - continued

- g. "Secondary Circuit" is the electrical facility from the Company's Transformer to a handhole or connectors from which one or more Service Circuits originate. The Secondary Circuit is single phase, is operated at less than 600 volts to ground and may include conductors, connectors, conduit, handholes and ditch. The Basic Cost of the Secondary Circuit shall be computed using the following rates.

Single-Phase Underground Secondary Circuit:

Fixed Costs: \$406 per customer  
Variable Costs: \$9.38 per foot

(I)

Single-Phase Overhead Secondary Circuit:

Fixed Costs: \$1,732 per customer

(N)

(N)

- h. "Service Circuit" is the electrical facility between the Company's Transformer, connectors, or handhole and the Point of Delivery for a single Customer or building. The Service Circuit is single phase, is operated at less than 600 volts to ground and may include conductors, connectors, conduit, and ditch. The Basic Cost of the Service Circuit shall be computed using the following rates. These rates do not include meters and metering facilities which are used by the Company for billing purposes.

Single Phase Overhead Service Circuit:

Variable Costs: \$3.85 per foot

(I)

Single Phase Underground Service Circuit:

Variable Costs: \$8.83 per foot

(I)

- i. "Transformer" Basic Cost shall be computed using the following rates for single phase transformers.

Single Phase Overhead Transformer Costs: \$2,202 per Customer  
Single Phase Padmount Transformer Costs: \$2,946 per Customer

(R)

(R)

- j. "Underground Facilities" may include primary cable, secondary and service cable, secondary and service connections, surface-type (pad-mount) Transformers, concrete pads, enclosures, switch gear, terminations, equipment protective barriers and conduit or duct where necessary. These facilities will be owned, operated and maintained by the Company unless otherwise provided for by agreement.
