Hi Calvin,

As discussed in our meeting in July, Orcas Recycling Services will be raising prices on co-mingled recycling and mixed solid waste for self-haulers and franchise haulers this fall.

ORS is required to get any price increase approved by San Juan County Council; we received that approval on September 10, 2019.

The price changes, enclosed, will go into effect October 1, 2019 for self-haulers.

As per UTC rules, franchise haulers have 75 days from notice to implement the changes. Therefore the prices below will go into effect for San Juan Sanitation on or after December 1, 2019.

Most of the products listed have not changed in price.

Please note the "light load" charge, which we discussed several months ago. This will only affect SJS in the case of a roll-off box that contains mostly Styrofoam, insulation, or other light weight/bulky material. Sometimes this can be from a teardown or re-model; it is often associated with the disposal of old docks.

Best regards,
