

**WA Case 21-017**  
**Northwest Grading vs Avista**

**Alleged Violation:** 19.122.030 Failure to completely and adequately mark utility lines

**Location:** Cedar Road in Deer Park

**Locate Ticket:** No ticket number listed on complaint

**Summary:**

Northwest Grading's complaint references Comcast, Avista is not affiliated with Comcast nor does ELM Utility Locating Services locate for Comcast. This complaint is extremely vague which makes it difficult for Avista to address the issues in the complaint without having received supporting documentation from Northwest Grading prior to Avista having to provide a response. Avista offers the following response:

Neither Avista nor ELM is aware of an unmarked electrical line that was discovered on this project. There is no reference as to when or where that line was discovered. There are a few abandoned lines in this project area as Avista relocated some of their facilities just prior to the start of this project.

Northwest Grading is working on a large road construction project on Cedar Road in Deer Park with multiple locate tickets. This project is over a mile long from 6<sup>th</sup> to Enoch which anything over 700 feet is defined as a large project. See **Exhibit A** for vicinity map of project area. As such Northwest Grading should have conferred with Avista's locator's on phasing of the project for locates.

No locate ticket was cited in the complaint so Avista will start with the first 2 Tickets Northwest Grading submitted which are Tickets 21087212 1 of 2 712 Cedar Road **Exhibit C** and 21087222 2 of 2 Cedar Road **Exhibit D** on Friday, March 5, 2021 for the same project one for south of the airport entrance starting at 6<sup>th</sup> St and one for north of the airport entrance to Enoch. According to the locator's comments in both **Exhibit C and Exhibit D** Northwest Grading did not plan to begin construction until April. Most of the marks were completed for the first ticket 21087212 **Exhibit C** on March 9, 2021. Since Northwest Grading was not planning to start their project right away or within the required 10 days, ELM did not mark the second ticket 21087222 as this was during the rainy season and the marks would not have lasted since Northwest Grading was starting on the south part of the project which was marked. Northwest Grading then submitted an update ticket for 21087222 2 of 2 which is locate ticket 21109473 on March 18, 2021 stating "markings from original ticket not completed", **Exhibit E**.

Avista's understanding from conversations with ELM is that Northwest Grading was upset that Avista's facilities were not marked immediately for the entire project as they wanted to look over the project with all the locate marks down before they started construction. Northwest Grading failed to take reasonable steps to confer with Avista's locators to locate facilities reasonably in advance of each phase of the work as required in 19.122.030 (2).

See **Exhibit B** which is a list of all the locates tickets for Northwest Grading for this project to the date of the complaint with corresponding Exhibit identification (Exhibits C through I) which are copies of the locate tickets and locator's corresponding comments for each ticket.

Exhibit A – Vicinity map of Cedar Rd excavating project

**Exhibit B** – List of all locate tickets for Northwest Grading for the Cedar Rd project to date of the complaint and the corresponding Exhibit letter that has a copy of the locate ticket and the locator’s comments and response date for each Exhibit.
