- First Revision Sheet No. 301-B
- Tenth Revision Sheet No. 302
- Eighth Revision Sheet No. 302-A
- Second Revision Sheet No. 302-B

The purpose of this filing is to update the Energy Efficiency program structure commensurate with the Biennial Conservation Plan (BCP) filed on November 1, 2021 and accepted by the Washington Utilities and Transportation Commission in Docket UG-210838 on January 18, 2022.

The proposed changes support the budgets, revised program offerings developed from the 2021 Conservation Potential Assessment and align with terms and conditions as indicated in Exhibit 1 of the BCP. The Company worked with its Conservation Advisory Group to redesign these tariff sheets to reflect program offerings in Exhibit 1 to allow for future program updates within the biennium to be made in consultation with its Conservation Advisory Group. This update allows for removal of some offerings that are now code, additions of new measures, and increases to

incentives which were included in budgeting for the BCP. The Company believes these changes are crucial in order to achieve the Biennial Acquisition Target for 2022-2023 established in the BCP. Updates to this tariff sheet also bring the Company into alignment with conditions set within Docket UG-210838. The Company's Conservation Advisory Group was notified in advance of this filing and provided feedback which has been incorporated. This notification was sent as an electronic copy 32 days in advance of this filing on January 28, 2021.
