SERVICE CONNECTION CHARGES

C. Applications (Continued)

2. Primary Interexchange Carrier Change Charge (PIC Change Charge) applies each time an end user changes primary interexchange carriers. This charge is designed to cover costs incurred to change primary interexchange carriers in the billing and switching systems. This charge is also in lieu of the Service Order Charge.
3. Time and Material Charge
  - a. Time and Material Charges applies to all work performed at the Customer's premises on the Customer's side of the demarcation point up to but not including the network interface.
  - b. Time charges are billed on a 15 minute increment basis with a minimum charge applicable for the first 15 minutes. Chargeable time begins upon arrival at the premises and ends at the time work is finished (less any non-productive time).

D. Rates

|    |                           |                    |         |
|----|---------------------------|--------------------|---------|
| 1. | Installation Charge       | \$ 25.00           | (T) (I) |
| 2. | Supersedure               | \$10.00            |         |
| 3. | PIC Change Charge         | \$ 5.50            |         |
| 4. | Time and Material Charges | Average labor rate | (T)     |

E. Insufficient Fund Charge

1. A charge of \$25.00 will apply each time a customer makes a payment by check, credit card, debit card or by any other means that is not honored, or is declined for any reason, by a bank or other financial institution.
