Amanda Maxwell, Executive Director and Secretary
Washington Utilities and Transportation Commission
621 Woodland Square Loop SE
Lacey, WA 98503

Subject: Brem-Air Disposal, a division of Waste Management of Washington, Inc. (G-237); Tariff # 20

Enclosed are the revised tariff pages 2, 22 and 25 to the above-referenced tariff. The purpose of these tariff revisions is to reflect the change in the commodity charges/ <credits> for residential and multi-family customers receiving recycling collection services. These tariff revisions reflect a change in the current recycling credit from \$1.64 per month to a charge of \$0.12 per month for residential customers and a change in the current recycling credit of \$0.81 per unit to a charge of \$0.07 per unit for multi-family customers.

The change in the commodity charge to a credit is jointly due to the change in commodity values, tonnages and materials composition since the commodity credit adjustment on November 1, 2022. We are requesting that the proposed effective date of these tariff revisions be November 24, 2023.

Additionally, due to the commodity credit expiring on October 31, 2023, we are filing this recycling commodity adjustment with an LSN with an effective date of November 1, 2023. Due to an issue with our recycling data, we were unable to file within the 45 day window.

Enclosed for your review are our accounting work papers. Customers will be notified of the change in their recycling <credit> debit adjustment on their next regularly scheduled billing after approval by the Commission. In addition, the county has been notified of these proposed tariff changes.
