**SCHEDULE 141TEP
TRANSPORTATION ELECTRIFICATION PLAN
ADJUSTMENT RIDER (Continued)**

TRUE-UP: Each year, the Company estimates the amount of costs to be included in the Transportation Electrification Plan Adjustment Rider rates based on budgets for the implementation of the Company’s Transportation Electrification Plan approved by the Commission, as well as provides for a true-up of amounts from the prior rate period. Amounts to include in each year’s true-up are:

- a. A true-up equal to the actual operating expenses and depreciation and return on rate base paid or incurred minus the amounts set in rates for that rate period;
- b. A true-up will be included for the difference between what was expected to be collected when rates were set the previous year versus the amount actually collected that is due to variances in load; and
- c. As part of the annual filing, the Company will provide reports of the actual amounts for operating and maintenance expenses and rate base items that are included in the true-up calculation to allow for review by interested parties.

If a true-up calculation results in expenses/return being lower or actual revenues being higher than what was used to set rates, the amount will be a reduction to the amount to be otherwise collected under Schedule 141TEP during the current year. If a true-up calculation results in expenses/return being higher or actual revenues being lower than what was used to set rates, the resulting amount will be an addition to the amount to be otherwise collected under Schedule 141TEP during the current year.

MONTHLY RATE: The rate shown below and on the following sheets shall be added to the rate(s) shown on each schedule for electric service.

SCHEDULES 7, 307, 317 & 327

Energy Charge \$0.000319 per kWh
