Jeff Killip

Executive Director and Secretary
Washington Utilities and Transportation Commission
PO Box 47250
Olympia, WA 98504-7250

Dear Executive Director Killip:

Enclosed for filing please find an application for a Solid Waste Collection Company under Chapter RCW 18.77.040 on behalf of DTG Enterprises, Inc. ("DTG Recycle"). DTG Recycle has been operating in Washington State for over 25 years and is the largest recycler of commercial, industrial, construction, and demolition waste in the Pacific Northwest. We are proudly Washington-based, employing 587 employees across 7 counties. DTG is a state and nationally recognized recycler and has received awards from associations including the AWB and CDRA. We continually innovate to better serve our customers, our employees and our environment.

While DTG does not concede that its C&D operations currently require a solid waste permit, DTG agrees with Staff that the size and statewide scale of DTG may call for specific treatment. Accordingly, DTG submits this application in response to Staff's recommendation and both parties' understanding that C&D waste is not currently serviced such that a new entrant to the statewide market is warranted. DTG continues to pursue new and innovative ways to provide recycling services while working with generators to provide clean, source-separated recycling material. Please contact me at 425.508.7159 or jbajsarowicz@dtgrecycle.com if you have any questions regarding our application.

Sincerely,

A handwritten signature in blue ink, appearing to read "JB 38".

Janusz Bajsarowicz
Director of Compliance
