Ch-	tracter of Roadway:		[3]		м.		
	State Highway-Classification	Arte	rial		· ,		
(b)	County Highway-Classification	n Arte	rial.				
(c)	City Street-Classification	Arte	rial	<u> </u>			
(d)	Number of traffic lanes existing in each direction: Number of additional traffic lanes proposed:						
(c)	Posted vehicle speed limit: At	utomobiles <u>2</u>	5 MPH Tr	ucks 25	МРН		
([)	Estimated vehicle traffic in 24	hours: Curren	1 10121 1000	, including	40 trucks and		
	school bus trips. Proje	cted traffic in	years: total	, inclu	ding trucks		
	andschool bus trip	os.					

(a) If temporary, state for what purpose crossing is to be used and for how long.

N/A

(b) If temporary grade crossing, will you remove the crossing at completion of the activity requiring the temporary crossing?

N/A

[5]

(a) State whether or not a safer location for a grade crossing exists within a reasonable distance in either direction from the proposed point of crossing, and if so, what reason, if any, why this safer location should not be adopted, even though in doing so, it may be necessary to relocate a portion of the highway or railway.

No

(b) Are there any hillsides, earth, or other embankments, buildings, trees, orchards, side tracks (on which cars might be spotted), loading platforms, etc., in the vicinity not feasible to move, which may obstruct the view and which can be avoided by relocating the proposed crossing. Would it be practical to do so? Please describe.

No

[6]

(a) Is it feasible to construct and use an over or under crossing at the intersection of said railway and highway? If not, state why.

No. It is economically infeasible and does not warrent a grade separation at this time.

(b) Does the railway line at any point in the vicinity of the proposed crossing pass over a fill or trestle or through a cut where it is feasible to construct an under or over crossing, even though it may be necessary to relocate a portion of the highway to reach that point?

No

(c) If a suitable place for an under - or over - crossing exists in the vicinity of the proposed crossing, state the distance and direction from the proposed crossing; the approximate cost of construction; and what, if any, reason exists why it should not be constructed.

N/A

- (a) State approximate distance to nearest public or private crossing in each direction of railroad involved herein. 1.45 miles north - 184th S.€. 1.72 miles south - Private crossing
- (b) If there is an existing crossing in near vicinity, or if more than one crossing is proposed, is it feasible to divert highways served and to be served by existing and proposed crossings, thus eliminating the need for more than one crossing? No
- (c) If so, state approximate cost of highway relocation to effect such changes.

WEST

N/A

- (d) Will the proposed crossing eliminate the need for one or more existing crossings in the vicinity? If so, state direction and approximate distance to the crossing or crossings. No
- (c) If this crossing is authorized, do you propose to close any existing crossing or crossings?

No

[8]

State the lengths of views which are now available along the line of railway to travelers on the highway when approaching the crossing from either side of the railway and when at points on the highway as follows:

Approaching crossing from $\dots, \mathcal{W} \in S^1, \dots$ (direction) an	unobstructed view to	
right when on highway 300 feet from crossing of	NA	feet
right when on highway 200 feet from crossing of	NA	fect
right when on highway 100 feet from crossing of	150	fect
right when on highway 50 feet from crossing of	270	fect
right when on highway 25 feet from crossing of	800	feet
lest when on highway 300 feet from crossing of	NA	fcct
left when on highway 200 feet from crossing of	NA	fect
left when on highway 100 feet from crossing of	1000	fect
lest when on highway 50 feet from crossing of	200 71500	fect
left when on highway 25 feet from crossing of	820>1500	feet
Approaching crossing from e.as. T. (opposite direction)	an unobstructed view to	0
right when on highway 300 feet from crossing of	NA-	feet
right when on highway 200 feet from crossing of	NA	feet
right when on highway 100 feet from crossing of	1000	feet
right when on highway 50 feet from crossing of	7/500	_fect
right when on highway 25 feet from crossing of	71500	feet
left when on highway 300 feet from crossing of	NA	_feet
left when on highway 200 feet from crossing of	NA.	_fect
lest when on highway 100 feet from crossing of	250	_fect
lest when on highway 50 feet from crossing of	500	_feet
lest when on highway 25 feet from crossing of	1000	feet

Attach one or more prints showing a vicinity map and a layout of railway and highway, as well as profiles						
of each, also showing percent of grade, 500 feet of highway and railway when approaching crossing from all						
four directions. On the prints, spot and identify obstructions of view located in all four quadrants. Provide						
a traffic control layout showing the location of the existing and proposed signing of the intersection.						
6 11 12 10 10 1 A = 3 = 3						

See the exhibit "C" attached [10]

(a) Is it feasible to provide a 25 foot level grade crossing on both sides from center line of railway at point of crossing?

Yes

(b) If not, state in feet the length of level grade it is feasible to obtain.

N/A

(c) Is it feasible to obtain an approach grade, prior to the level grade of five percent or less? If not, state why, and state the percent approach grade possible.

Yes

[11]

Do you know of any reason not appearing in any of the answers to these interrogatories why the proposed crossing should not be made at grade or at the point proposed by you? If so, please state same fully.

No

Interrogatories 12 and 13 are to be completed only if this petition involves installation, replacement or changing of automatic grade crossing signal or other warning device, other than sawbucks.

[12]

- (a) State in detail, the number and type of automatic signals or other warning devices (other than sawbucks) proposed to be installed. (This portion should be filled in only after conference between the railroad and the petitioning local governmental agency.)

 Upgrade activation devices
- (b) State an estimate of the cost for installing the signals or other devices proposed, as obtained from the respondent railroad company....\$ 45,000
- (c) State a cost estimate for maintaining the signals or devices for 12 months, as obtained from the respondent railroad company
- (d) If this is an existing crossing, what will the proposed warning devices replace in the way of existing devices.

No signal replacement necessary.

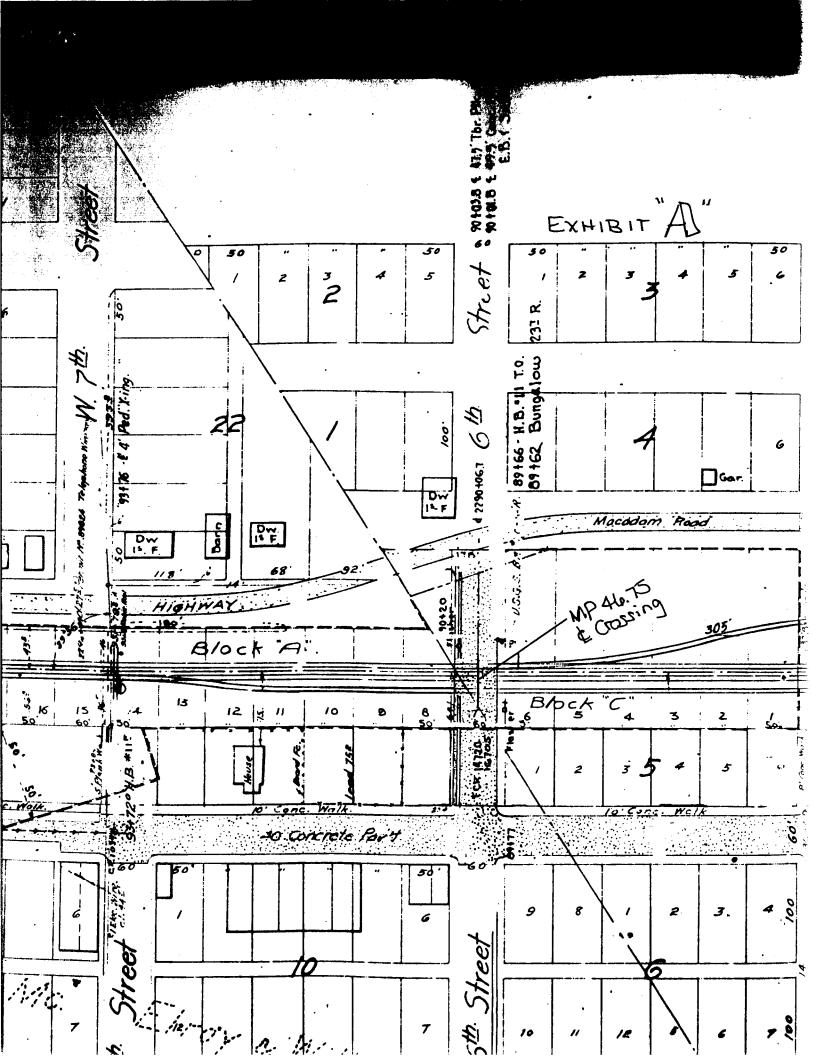

(e) As the petitioner, are you prepared to pay or will you promise to pay to the respondent railroad company, your share of the cost of installing the warning devices proposed as provided by law?

() Yes () No N/A

[13]

Furnish a brief statement of why the public safety requires the installation of the automatic signals or the devices as proposed.

Upgrade activation devices will improve the safety of the motoring public.

INSTRUCTIONS

General

Petition forms with the interrogatories fully and correctly answered should be filed with the Washington Utilities and Transportation Commission, Chandler Plaza, 1300 S. Evergreen Park Drive SW, Olympia, Washington, 98504. Blank forms may be obtained from the same address. All pleadings herein shall conform with WAC 480-09-420 and 425 of the Commission's Rules of Practice and Procedure.

Number of Copies

File the original and one copy if the "Waiver of Hearing by Respondent" is filled out. If petitioner intends that the Commission serve the respondent, the original and two copies should be filed. If the petitioner serves the respondent, a certificate of service in conformity with the requirements of WAC 480-09-120 of the Commission's Rules of Practice and Procedure must be filed.

Parties Who May Petition or Respond

In general, the following persons may file or respond to a petition: highway authorities (city, county, or state), railroad companies, and state agencies with lawful authority to construct and maintain public highways (RCW 81.53.030 and 060). In situations where there may be more than one party of interest as either a petitioner or a respondent, all parties should be joined.

Waiver of Hearing by Respondent

The proceeding can usually be expedited by submitting the application to the respondent and securing the execution of the "Waiver of Hearing by Respondent". As an alternative, respondent may file a separate "Answer." If the pleadings show that the respondent has no objection, an order may be entered without hearing at the discretion of the Commission, unless the public interest appears to require hearing and unless hearing is required under the terms of RCW \$1.53.030 or 060. In all other cases, the petition will be set for hearing.

Crossing Construction

Applications for crossing state highways should be submitted in duplicate to the District Highway Engineer in the locality for his recommendation to be attached and forwarded to the State Department of Transportation Secretary, Olympia.

A party, after having been granted authority by the Commission to construct a crossing, must acquire right of way or easement because the order of the Commission merely relates to public safety and grants only the right to cross, subject to acquiring a right of way or easement.

Time for Replying to a Petition

A petition not answered within 20 days of the date of service, shall be deemed denied and may be set for hearing. If a qualified or conditional answer is filed by the respondent, the petitioner may file a "Reply" within 10 days of the date the "Answer" is served.

(PLEASE REMOVE THIS SHEET BEFORE FILING PETITION)
