Subject: Puget Sound Energy Integrated Resource Plan (UE-120767)

Dear Chairman Danner, Washington Utilities and Transportation Commission: As a current customer of PSE - and a citizen very concerned about climate change - I believe it is important to include social and economic costs of carbon in any final Integrated Resource Plan submitted to your commission. I am personally committed to investing in clean, renewable energy and reducing our reliance on carbon intensive sources of energy. We must all prepare for a carbon-constrained future - and PSE can play a significant role in making a difference. The Colstrip Generating Facility is a prime example of a facility past its time. Therefore I ask that all final recommendations in the IRPs coming before the UTC include a broad examination of carbon pollution, new federal air quality standards, and other social & environmental costs associated with the continued operation of the Colstrip facility. Thank you,

Hank Kastner
