Re: UG-152286, Petition to Increase Washington Energy Assistance Fund Program Spending Caps

Cascade Natural Gas Corporation (Cascade or the Company) herewith files a petition to increase the "not to exceed" program year spending caps established for the Company's Washington Energy Assistance Fund (WEAF) program in the settlement agreement to the Company's most recent rate case, UG-152286. The settlement agreement explicitly authorizes the Company to petition to exceed the WEAF program spending caps which the Company now finds it necessary to do in order to meet the goal, also adopted in the settlement agreement, of serving more customers.

If you have any questions, please contact Jennifer Gross at 509.734.4635.

Sincerely,

/s/ Michael Parvinen
