Dear Mr. King:

RE: Docket UE-170682- Revised Avista Utilities 2017 Renewable Target Compliance Report

On June 1, 2017, in compliance with WAC 480-109, Avista Utilities submitted its "Compliance Report" demonstrating compliance with the renewable energy component of I-937, the Energy Independence Act, for 2017. Upon review of the Company's report, Commission Staff identified an error in the report related to the Company's historical retail loads for 2015 and 2016, which are used to calculate the 2017 Renewable Energy Target. The revised report included within this filing corrects the historical load information and 2017 target. As a result of the correction the 2017 target was reduced to 504,050 MWh from the target of 506,400 MWh identified in the original report.

In addition to the revised report the Company has revised the necessary attachments that support its 2017 Renewable Target Compliance Report.

If you have any questions regarding this information, please contact John Lyons at 509-495-8515 or myself at 509-495-4975.

Sincerely,

/s/ Linda Gervais/
