Subject: Puget Sound Energy Integrated Resource Plan (UE-120767)

Dear Chairman Danner, Washington Utilities and Transportation Commission: I'm a customer of PSE, and a contributor to its Green Power program. I want to see PSE do more toward reducing their coal burning pollution. A twenty year plan needs to have aggressive goals and actions, or they are letting us down. I believe that it's important to include the estimated social and economic cost of carbon in any final Integrated Resource Plan submitted to your commission. We may not have a federal carbon tax to show the way, but the people of Washington State recognize the crisis we have coming in the near term with ocean acidification and the damage to our fisheries, just to name one close-to-home example. If prices have to rise, the better to encourage conservation, which is our best new source of energy. Thank you,

Jean Waight
