Executive Director and Secretary Amanda Maxwell,

Thank you for the opportunity to provide comment on Docket UE-210183, Relating to Electricity Markets and Compliance with the Clean Energy Transformation Act.

CETA required our utilities to transition to 100% nonemitting electricity generation. I believe this fundamental goal should not be compromised by the continuance of "retained Renewable Energy Credits" that would allow "offsets" to enable utilities' continued use of fossil fuel-generated electricity.

Large-scale investments in clean energy are required now to help transition our entire economy away from fossil fuels.

Our state has provided a blueprint to the nation and the world, showing it's possible to make a just transition to a 100% clean electricity future. Thank you for your consideration and for your work to faithfully implement CETA.

Sincerely,
John Lee
