Energize Eastside North Segment Project has not been submitted for a permit in Bellevue yet and is not currently under legal challenge.. This Project was repeatedly promised an IRP technical review and discussion over the past 3 years. PSE removed it from or did not include in the agenda. This is frustrating to IRP members and does not serve PSE customer interests. It seems PSE's approach has been that this project is none of our business. PSE has reportedly already spent over 80 million dollars on the total project without customer interest technical review. It is time to include the EE North Segment as part of the IRP review as required by Washington State Law. This will ensure that the public interest is served. Norman Hansen IRP Technical Member and BSEE Michigan State University
