---

**SETTLEMENT TESTIMONY OF BRADLEY G. MULLINS  
ON BEHALF OF  
THE INDUSTRIAL CUSTOMERS OF NORTHWEST UTILITIES**

**April 11, 2017**

1 **Q. PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.**

2 A. My name is Bradley G. Mullins, and my business address is 333 SW Taylor Street, Suite  
3 400, Portland, Oregon 97204.

4 **Q. PLEASE STATE YOUR OCCUPATION AND ON WHOSE BEHALF YOU ARE**  
5 **TESTIFYING.**

6 A. I am an independent energy and utilities consultant representing large energy consumers  
7 throughout the western United States. I am appearing on behalf of the Industrial  
8 Customers of Northwest Utilities (“ICNU”). ICNU is a trade association whose members  
9 are large electric customers served by electric utilities throughout the Pacific Northwest,  
10 including Puget Sound Energy (“PSE” or the “Company”).

11 **Q. PLEASE SUMMARIZE YOUR EDUCATION AND WORK EXPERIENCE.**

12 A. I have a Master of Science degree in Accounting from the University of Utah. After  
13 obtaining my Master’s degree I worked at Deloitte, where I ultimately specialized in  
14 research and development tax incentives for multi-national corporate clients.  
15 Subsequently, I worked at PacifiCorp as an analyst involved in regulatory matters  
16 surrounding power supply costs. I currently provide services to utility customers on  
17 matters such as power costs, revenue requirement, rate spread and rate design. I have  
18 sponsored testimony in numerous regulatory jurisdictions throughout the United States,  
19 including before the Washington Utilities and Transportation Commission  
20 (“Commission”). A list of my regulatory appearances can be found in Exhibit No.  
21 BGM-2.

22 **Q. WHAT IS THE PURPOSE OF YOUR SETTLEMENT TESTIMONY?**

23 A. I discuss the support of ICNU for the Settlement Stipulation and Agreement  
24 (“Stipulation”) that resolves all issues in this docket. A summary of the procedural

1 background in this matter can be found in the Joint Memorandum in Support of the  
2 Settlement Agreement.

3 Specifically, I provide ICNU's perspective on the reasonableness of the \$23.7  
4 million "transition fee" that Microsoft has agreed to pay, pursuant to paragraph 10 of the  
5 Stipulation, and why ICNU considers this fee to be in the public interest given the  
6 circumstances of this case.<sup>1/</sup> I also discuss the relationship between the transition fee  
7 amount and Microsoft's potential obligation to contribute to Colstrip remediation,  
8 decommissioning and/or accelerated depreciation costs.

9 **Q. PLEASE SUMMARIZE YOUR TESTIMONY.**

10 A. The \$23.7 million fee that Microsoft has agreed to pay in order to begin taking retail  
11 wheeling services will more than compensate the Company's remaining customers for  
12 any costs they may incur as a consequence of Microsoft's departure. This is because the  
13 amount of this fee does not account for the long-term benefits that the Company's  
14 remaining ratepayers will receive as a result of the departure of Microsoft load. This is  
15 particularly true considering the benefits that the departure of Microsoft load will provide  
16 to remaining customers when the Company retires Colstrip Units 1 and 2, which must  
17 occur no later than July 2022. Since the transition fee did not include the long-term  
18 benefits of avoiding replacement capacity for Colstrip Units 1 and 2, it was an important  
19 consideration for ICNU that the Stipulation contain language explicitly acknowledging  
20 that any potential obligations of Microsoft with respect to Colstrip were not resolved by  
21 the Stipulation and were reserved for future ratemaking proceedings.<sup>2/</sup> Such a provision

---

<sup>1/</sup> Stipulation ¶ 10. See also Exh. No. JAP-1CT at 2:1-9.

<sup>2/</sup> Stipulation ¶ 11.

1 will preserve parties' ability to consider costs and benefits reflected in the transition fee  
2 when evaluating any potential obligations Microsoft may have with respect to the  
3 retirement of Colstrip Units 1 and 2.

4 **Q. DOES THE TRANSITION FEE ACCOUNT FOR THE FULL AVOIDED COST**  
5 **OF ACQUIRING REPLACEMENT CAPACITY FOR COLSTRIP UNITS**  
6 **1 AND 2?**

7 A. No. Pursuant to the July 12, 2016 Consent Decree lodged in the United States District  
8 Court, District of Montana, the Company and Talen Energy agreed to permanently cease  
9 operation of Colstrip Units 1 and 2 on, or before, July 1, 2022.<sup>3/</sup> Retirement of Colstrip  
10 Units 1 and 2—which were originally placed into service in 1975 and 1976,  
11 respectively—will represent a loss to the Company of approximately 307 MW of  
12 capacity.<sup>4/</sup> Due to this loss of capacity and as a result of expected load growth, the  
13 Company expects that it must acquire replacement capacity in order to serve its loads in  
14 the near future. In fact, based on recent presentations to the 2017 Integrated Resource  
15 Plan (“IRP”) Advisory Group, the Company now believes that it will have a resource  
16 deficit of approximately 550 MW as soon as 2020 if Microsoft continues to be served as  
17 a cost of service customer.<sup>5/</sup> When Microsoft departs, however, the Company will be  
18 able to avoid acquiring a significant amount of this replacement capacity. However, the  
19 methodology used to calculate the transition fee only provided for minimal value  
20 associated with avoiding or deferring new resources due to the departure of Microsoft  
21 load.

---

<sup>3/</sup> See WUTC v. PSE, Dockets UE-170033/UG-170034, Exh. No. RJR-18 at 6-7.

<sup>4/</sup> See PSE 2015 IRP, Appendix K at K-3.

<sup>5/</sup> Exh. No. BGM-3 at 14 (Att. A to the Company's Response to ICNU DR 015 (PSE 2017 IRP Advisory Group Presentation at 16)).

1 **Q. WHAT METHODOLOGY DID THE COMPANY USE TO CALCULATE THE**  
2 **TRANSITION FEE?**

3 A. The Company calculated the transition fee based upon a ratepayer impact measure, which  
4 accounted for both the savings resulting from the departing load, as well as lost revenue.  
5 The Company calculated the annual revenue requirement savings associated with the  
6 departure of Microsoft load using the Portfolio Screening Model III.<sup>6/</sup> These model runs,  
7 based on resource portfolio assumptions loosely aligned with the Company's 2015 IRP,  
8 calculated the savings in energy and capacity costs associated with the departing  
9 Microsoft loads. Next, the Company deducted the lost production cost revenues  
10 associated with the departure of Microsoft load in order to derive a ratepayer impact  
11 measurement associated with the departing load to remaining customers.<sup>7/</sup>

12 **Q. DID THE ANALYSIS PROVIDE REASONABLE VALUE FOR THE CAPACITY**  
13 **AVOIDED AS A RESULT OF THE DEPARTURE OF MICROSOFT LOAD?**

14 A. No. Two aspects of the Company's analysis undervalued the savings associated with  
15 avoided replacement capacity. First, the Company limited its calculation of the transition  
16 fee to the five-year period 2018 to 2022, limiting recognition of long-term capacity  
17 benefits that remaining customers will receive due to the departure of Microsoft load.  
18 Second, the Company based its analysis on severely outdated assumptions, which are  
19 inconsistent with the current understanding of the Company with respect to its near-term  
20 resource needs.

---

<sup>6/</sup> Exh. No. JAP-1CT at 4:3-10.

<sup>7/</sup> Id. at 4:11-5:4.

1 **Q. HOW DID THE USE OF A FIVE-YEAR PERIOD IMPACT THE TRANSITION**  
2 **ADJUSTMENT?**

3 A. Based on the resource portfolio assumptions the Company used, Microsoft gets credit for  
4 only one year of benefit for avoiding replacement capacity associated with the retirement  
5 of Colstrip Units 1 and 2. Notwithstanding, avoiding that replacement capacity will  
6 result in material revenue requirement savings to remaining ratepayers over a long-term  
7 period, not just for a single year.

8 **Q. WHERE CAN IT BE NOTED THAT THE COMPANY ONLY PROVIDED ONE**  
9 **YEAR WORTH OF CAPACITY BENEFITS?**

10 A. It can be noted in Exh. No. JAP-3C. Over the first four years of the study (2018 – 2021),  
11 the rate impact to remaining customers is negative. In the fifth year (2022),  
12 corresponding to the timing of the closure of Colstrip Units 1 and 2, the revenue  
13 requirement differential and ratepayer impact is positive. My understanding is that it  
14 flips as a result of the recognition of the benefits to remaining customers associated with  
15 avoided capacity costs driven by the departure of Microsoft load. This benefit extends  
16 throughout years five through 20 of the study period. Yet, by limiting the calculation of  
17 the transition fee to the five-year period 2018 - 2022, the methodology only provides one  
18 year of capacity benefits, even though remaining customers are expected to receive  
19 significant benefits over the 20-year study period.

20 **Q. HOW MUCH DO REMAINING CUSTOMERS BENEFIT OVER THE 20-YEAR**  
21 **STUDY PERIOD?**

22 A. Compared to the \$23.7 million transition fee the Company proposes, the Company  
23 calculated that remaining ratepayers benefit by approximately \$23 million on a net  
24 present value revenue requirement basis over the 20-year study period. That figure is  
25 also likely understated as a result of the use of outdated resource assumptions.

1 **Q. WHY DID THE COMPANY INITIALLY PROPOSE A FIVE-YEAR PERIOD?**

2 A. The testimony of the Company on this topic is limited, though the Company appeared to  
3 rely primarily on the Commission's decision and parties' positions in Docket No.  
4 UE-132027, the accounting petition regarding the proceeds from the sale of assets to  
5 Jefferson County PUD.<sup>8/</sup> The Company noted that parties rejected the Company's  
6 position in that docket that it should be awarded the gain on the sale of assets based on a  
7 20-year analysis showing a net benefit to customers from this sale, arguing that  
8 calculating benefits this far into the future was speculative. The Company has used  
9 similar reasoning in this docket to argue that it would be reasonable to calculate a  
10 transition fee over a five-year period.<sup>9/</sup>

11 **Q. IS THIS PROCEEDING DISTINCT FROM THE JEFFERSON COUNTY PUD**  
12 **PROCEEDING?**

13 A. Yes. The Jefferson County PUD proceeding involved proceeds from the sale of assets.  
14 In this proceeding, no assets are being sold. Microsoft will still receive distribution, retail  
15 wheeling and other services from the Company, and is not receiving ownership of any  
16 assets in consideration for its payment of the \$23.7 million transition fee. The  
17 Commission's decision in the Jefferson County PUD proceeding to allocate the gain on  
18 the sale of these assets to customers was not based on a net present value analysis over  
19 any particular period. It was based on the principle that customers bore the risks and  
20 burdens associated with the sold assets and, therefore, should receive the rewards and  
21 benefits.

---

<sup>8/</sup> Id. at 9:13-18

<sup>9/</sup> Id.

1           Additionally, PSE is currently facing an unusual circumstance in that it knows  
2 with virtual certainty that it will lose 307 MW of capacity by no later than 2022 with the  
3 retirement of Colstrip Units 1 and 2. While ICNU generally agrees that calculations of  
4 long-term costs and benefits are more speculative the farther out they go, and was one of  
5 the parties that argued against using a 20-year benefits study in the Jefferson County  
6 PUD proceeding, it *is* appropriate to account for known future circumstances, and the  
7 savings core customers will realize through reduced capacity requirements associated  
8 with Microsoft's departure is such a known circumstance.

9 **Q. IS THE PROPOSED TRANSITION FEE ALSO BASED ON OUTDATED**  
10 **ASSUMPTIONS?**

11 A. Yes. The analysis performed by the Company is based on information from its 2015  
12 IRP,<sup>10/</sup> although the analysis was not based on any particular study filed in the 2015 IRP.  
13 Rather, it appears that the transition fee was based on a study populated with some  
14 assumptions from the 2015 IRP, but with a number of other modeling changes based on  
15 comments received in the Commission's IRP acknowledgement letter dated May 9, 2016.  
16 In reviewing the Company's filing, it was not clear to me why the Company made  
17 modeling changes to reflect the Commission's IRP acknowledgement letter but did not  
18 update all of its assumptions to be based on more recent information.

19 **Q. IS THE COMPANY CURRENTLY OPERATING UNDER NEW**  
20 **ASSUMPTIONS?**

21 A. Yes. On February 3, 2017, for example, the Company made a presentation to the 2017  
22 IRP Advisory Group. In that presentation, the Company suggested that, after updating

---

<sup>10/</sup> Id. at 7:1-13.

1 assumptions and incorporating guidance from the Commission's IRP acknowledgement  
2 letter, it will have a resource need as early as 2020.<sup>11/</sup>

3 **Q. DOES THE 2020 RESOURCE NEED ASSUME MICROSOFT WILL CONTINUE**  
4 **TO BE SERVED AS A COST OF SERVICE CUSTOMER?**

5 A. Yes.<sup>12/</sup> Accordingly, if Microsoft were to depart from the Company's system, the need to  
6 acquire a new resource in 2020, as identified in the 2017 IRP Advisory Group, would be  
7 diminished.

8 **Q. WHAT IMPACT WILL THE UPDATED ASSUMPTIONS HAVE ON THE**  
9 **TRANSITION ADJUSTMENT CALCULATION?**

10 A. In discovery, ICNU requested that the Company update the transition fee calculation  
11 based on the updated assumptions, as presented in the February 3, 2017 IRP Advisory  
12 Group meeting. The Company, however, was not willing to perform the calculation.<sup>13/</sup>

13 As noted previously, the departure of Microsoft load provides benefits to  
14 remaining customers by deferring or avoiding resource acquisitions, as confirmed by the  
15 Company's own analysis. Thus, the earlier resource need would mean more significant  
16 benefits to customers associated with avoided replacement capacity. In fact, it is possible  
17 that, if the assumptions were updated, the departure of Microsoft load would represent a  
18 benefit to customers, even if measured over a five-year period.

---

<sup>11/</sup> Exh. No. BGM-3 at 14 (Att. A to the Company's response to ICNU Data Request No. 15 (PSE 2017 IRP Advisory Group Presentation at 17)).

<sup>12/</sup> Id. at 15 (the Company's response to ICNU Data Request No. 017).

<sup>13/</sup> Id. at 16 (the Company's response to ICNU Data Request No. 018).

1 **Q. GIVEN THESE CONCERNS, WHY DOES ICNU BELIEVE THAT THE**  
2 **TRANSITION FEE IS REASONABLE?**

3 A. The transition fee is reasonable because it is acceptable to Microsoft. With respect to the  
4 transition fee calculation, Microsoft shared many of my concerns discussed above.<sup>14/</sup>  
5 Notwithstanding, it appears that Microsoft was willing to accept the transition fee amount  
6 proposed by the Company for a number of business reasons, many of which have less to  
7 do with the economics of the Company's system and more to do with achieving  
8 sustainability objectives and supporting its local communities. More than 40,000  
9 Microsoft employees live and work in the Puget Sound area, and accordingly, Microsoft  
10 has an interest in ensuring that local communities remain robust and healthy. These types  
11 of social considerations are difficult to quantify in terms of IRP portfolio modeling. Yet,  
12 they appear to have played an integral role in the willingness of Microsoft to accept the  
13 transition fee the Company proposed. Taking these factors into consideration, I view the  
14 transition payment to be reasonable not on the basis of stranded costs, but rather on the  
15 basis that it represents goodwill on the part of Microsoft.

16 **Q. DOES THE SPECIAL CONTRACT AUTHORIZED BY THE SETTLEMENT**  
17 **MEET THE COMMISSION'S REQUIREMENTS FOR SUCH CONTRACTS?**

18 A. I believe so. The Joint Memorandum explains these requirements in detail and describes  
19 why the special contract meets these requirements. I would add that the transition fee  
20 Microsoft has agreed to pay more than ensures that the contract charges will recover all  
21 costs resulting from PSE's provision of service to Microsoft under the contract.  
22 Regardless of Microsoft's commitments to purchase its power from carbon-free energy

---

<sup>14/</sup> See Exh. No.\_\_(GSS-1T).

1 sources, ICNU considers the net economic benefit that remaining customers will realize  
2 through Microsoft's departure to make the special contract in the public interest.

3 **Q. HOW DOES THE LANGUAGE REGARDING COLSTRIP REMEDIATION**  
4 **RELATE TO THE TRANSITION ADJUSTMENT?**

5 A. The ability of the Commission to consider the transition fee amount when evaluating the  
6 allocation of Colstrip remediation costs was also an important consideration for ICNU to  
7 support the transition fee amount. In paragraph 11 of the Stipulation, parties agreed that  
8 the treatment of any of Microsoft's potential obligations with respect to Colstrip  
9 remediation expenses would be addressed in future filings. Given the fact that the  
10 transition fee provided minimal benefits associated with avoided replacement capacity for  
11 Colstrip Units 1 and 2, it would violate the matching principle if, for example, Microsoft  
12 were required to pay 18 years' worth of accelerated costs associated with retiring Colstrip  
13 Units 1 and 2. Thus, the language in paragraph 11 was important because it preserved the  
14 right of parties to consider the transition fee amount when making ratemaking proposals  
15 regarding Colstrip remediation, decommissioning and/or accelerated depreciation costs in  
16 future rate proceedings.

17 **Q. DOES ICNU SUPPORT THE COMMISSION OPENING AN INVESTIGATION**  
18 **ON RETAIL WHEELING?**

19 A. Yes. Paragraph 11 of the Joint Memorandum identifies a new docket that Staff will  
20 request the Commission open to hold a broader discussion of retail wheeling in  
21 Washington State. ICNU generally supports customer choice, including the ability of  
22 customers to choose how and where they source their power, provided that non-  
23 participating customers are not materially harmed, and a state-wide retail wheeling  
24 program could provide these customer benefits. While I do not have an opinion about the

1 Commission's legal authority to adopt such a program, I am aware that the state  
2 legislature has expressed a policy preference for at least some level of customer choice by  
3 refusing to mandate exclusive service territories in the state. Accordingly, an in-depth  
4 examination of the types of customer choice policies that would be in the public interest  
5 is warranted.

6 **Q. DOES THIS CONCLUDE YOUR SETTLEMENT TESTIMONY?**

7 A. Yes.
