Subject: Minor change

In Avista Utilities' preliminary comments in the electric and gas rule review (Docket Numbers UE-990473 and UG-990294), we proposed removing WAC 480-100-071(1)(c)--Discontinuance of service re flat rate service. We made this suggestion because the language was not clear to us.

In the meantime, we would like to suggest the following edit which retains this rule while addressing our concerns: "(c) Under flat rate service For non-metered load, for increased use of electrical energy [gas] without approval of the utility."

We understand that we will have the opportunity to discuss this and other issues at the June 3 workshops. However, we wanted you to be aware of this potential edit. Please direct any questions on this to me at (509)495-8706 or Dave DeFelice at (509)495-4919.
