Subject: Thank you for protecting WA's Clean Energy Future
Date: Tuesday, December 3, 2019 12:10:30 PM

Dear Washington UTC,

IF we allow global warming to continue, nothing else will matter in terms of a livable planet or a society that works for most. Ignoring science has become political sport, at the peril of us all. Do the right thing I support of a viable planetary ecosystem, which is what gives humans all we currently enjoy. Having money won't matter, because there will be little left to purchase, nor people left to do the work that the wealthy profit from. At this point, it is disgusting that we even have to continue to talk about this.

This is a comment for Docket # UE 190698.

As a Washington State ratepayer, I am strongly in support of effective public accountability and engagement for investor-owned utilities. I am excited for Washington's Clean Energy Transformation Act (CETA) to take effect, and appreciate your role in making sure that the implementation of this law delivers on its intended vision of a state powered by 100% clean energy.

With that in mind, I would like to make a comment on the importance of public participation in energy planning. Integrated Resource Plans have been a powerful tool for public input here in Washington State, and it has allowed customers to advocate for clean, transparent, and equitable energy decisions. These planning sessions are one of the few oversight and watchdog opportunities we get. Please keep the requirement that they happen every two years rather than every four, as proposed.

As a ratepayer and concerned resident, I thank you for representing my interests and making sure utilities are accountable to the public.

Sincerely,

Trula Thompson
