CONSUMER AFFAIRS

I'm writing in reference to the letter I received regarding the proposed rate increase for Waste Connections. I'm in protest and do not agree with the proposed rate increase. I'm curious as to what their "escalating costs of operations" are as fuel prices are now going back down.

Second, if there is to be a rate increase, I do not agree with their proposed rates. Why does someone that has 1 garbage can a week get an increase of \$.95 and someone that has 2 cans a week get an increase of \$4.00? That doesn't make sense. Shouldn't it be a \$1.90 increase? Why \$4.00?

Thank you for your time.

Neal Kandarian
