

Wise Choice Movers
12/7/2022

The intent of this letter is to ask for mitigation of the suspended penalty for Wise Choice Movers, LLC and also to explain my repeat of a critical violation and how I will correct it in the future.

I had a critical violation for my drivers not keeping record of duty status in 2020 and since then I have been using time cards for each driver. They were writing down each day there total time for the job and not start/end times which I did not know we needed to have both on the time card.

We do use the standard moving bill of lading that has each jobs start, arrive, depart, and end times. I thought between that and time cards with there total time we were in compliance.

I have corrected this mistake and now all my drivers write their start/stop time plus total time on their timecards daily.

Unfortunately this was a repeat violation for my company and I am hoping and asking that since it was a small mistake on our part and easily correctable, that the UTC committee will keep this penalty amount suspended.

We are a small business with few employees and a large fine will really hurt our business, especially during a recession and pandemic.

When Sandy came out she did see a huge improvement in all of my records/trucks. She also said that I would have been in permit status had my drivers filled out time cards correctly.

We here at Wisechoicemovers are trying hard to be in compliance with the UTC/ DOT in everyway possible

Thank you for your time and consideration on this matter
