External Email

Good morning,

I am writing to comment on Puget Sound Energy's (PSE) 2023 Gas Utility Integrated Resource Plan.

I agree with the arguments and comments contained in the [Washington Clean Energy Coalition's letter](#), dated May 8, 2023.

I am extremely concerned about PSE's plan. PSE is continuing to drag its feet to change rapidly to clean renewable energy. The recent IPCC reports make clear that we have no time for such short-sighted business as usual penny-pinching profit protecting strategies. To avoid a climate disaster that will destroy much of our and other species we need to act boldly. PSE's plan is at the opposite extreme.

PSE will charge customers over \$10 billion so they can buy carbon allowances and burn natural gas, permitting vast quantities of pollution during the next quarter-century. Ten billion dollars exceeds the cost of maintaining and modernizing the energy grid over that period. And to get there, PSE rejected viable, alternative plans that would achieve real emissions reductions, stabilize energy costs, and avoid unproven technologies.

Thank you for your attention to this email. Please reject PSE's plan and require changes.

Sincerely,

Rosemary Moore
