* - Note: major maintenance work performed concurrently that have materially different OEM recommended maintenance intervals have been split into separate events with the same completion date (ex: Gld Steam Major and Summary Inspections).

** - Note: monthly amortization rates may differ from amount calculated by dividing event cost by amortization period. This is due to late charges or adjustments that may be booked after the beginning of the amortization period. In such cases, the revised monthly rate is recalculated based on the remaining unamortized balance, including such late charges or adjustments, divided by the remaining amortization period. The monthly amortization rates included in the schedule above reflect the most current monthly rate available. (a) - Due to uncertainties in 2016 associated with pending NSR (new source review) litigation, the scope of the 2016 major maintenance event was reduced and a portion of the work was deferred into 2017.

(a) - Due to uncertainties in 2016 associated with pending NSR (new source review) litigation, the scope of the 2016 major maintenance event was reduced and a portion of the work was deferred into 2017
