RE: Docket UE-231031 Puget Sound Energy's Electric Tariff Revision

Mr. Killip,

I am writing to ask that the UTC approves PSE's tariff extension request. I am a PSE customer and believe that this request is in the best interest of all on PSE's grid. And the value of solar study that PSE and other parties involved with solar want to do will provide the accurate data needed to determine the most fair and equitable rate for net metered solar, without the bias that was obvious in the recent, very incomplete study funded by some utilities.

Rooftop solar is an important piece in the complex picture of how Washington will meet its clean energy goals. And I applaud that PSE is taking a progressive approach by working with the solar industry, and supporting their customers' right to generate their own power and receive fair compensation that takes into account the full benefits their private investment gives to others on the grid.

I respectfully urge you to approve this tariff request.

John Cassinerio
