

Chris Portrey and Sam Haverkemp

VERIZON DATA REQUEST NO. 25: The Commission's line extension rule, WAC 480-120-071, provides that the customer is responsible for paying for the cost of trenching or other structures required for placement of company-provided wire from the customer's property line to the residence for line extensions under that rule. *See* WAC 480-120-071(3)(b). Have you estimated the cost of such construction on your property if your Petition is granted? If so, what is that estimate? Do you believe that you would be able to pay that cost if required to?

I plan on performing installation personally.

I hold 06 and 07 Electrical Licenses and have associates which hold Low Voltage Licenses and would be able to perform installations to code.

No estimate, would dig it ourselves if necessary. Trench would be shared with petitioner Andy Williams.

Have you estimated the cost of such construction on your property if your Petition is granted? If so, what is that estimate? Do you believe that you would be able to pay that cost if required to?

Have not estimated, but would share the trench with some other petitioners and dig the trench ourselves if necessary.

Have you estimated the cost of such construction on your property if your Petition is granted? If so, what is that estimate? Do you believe that you would be able to pay that cost if required to?

Have not estimated, probably dig it ourselves. Trench would be shared among three petitioners.
